AECI® PLANT HEALTH

Welcome to the February | March 2024 edition of the AGRIFOODSA Magazine.

As we bid farewell to the month of love – and extreme heat, it seems – we look forward to cooler weather and very cool events in the agriculture and food industries, and the big event we're focussing on this month is KragDag Western Cape 2024. This expo will see in its second year at the Môreson Farm in the beautiful town of Malmesbury and will take place 21, 22 and 23 March 2024. KragDag promotes sustainable and self-sufficient living, offering solutions for energy, water, safety, health, food production, education, transport, and construction. They encourage creativity and entrepreneurship through expos, radio, courses, and newsletters, and provide a platform for innovative ideas. For more information about exhibiting or visiting, go to www.kragdag.co.za/webtuiste/ekspo-weskaap.

Why not get out and about and spread a little luck and love locally. While you're out be sure to support some of the many local businesses and places mentioned in this issue.

This month, special mention goes to our cover featured advertiser, the Fertilizer Association of Southern Africa (Fertasa). Established in 1959 and restructured in 2014, the association represents the fertilizer industry in Southern Africa, with its members producing, trading, blending and distributing fertilizer products across this region. Fertasa's purpose is to act as the recognised and preferred body that promotes the image of the fertilizer industry by promoting the integrity of its members and building preferential trust for their products and services, and also enhancing and protecting the interests of its members through effective engagement with government and organised agriculture. To find out more about their products and services, check out pages 24-25 & 40-41 or go to www.fertasa.co.za.

Apart from the magazine, be sure to have a look at our offerings on the AGRIFOODSA.INFO website at www.agrifoodsa.info, our bi-monthly newsletter and find us on all major social media platforms.

As we implement a few changes and make adjustments, we appreciate your patience and your feedback. Our mission is to continue to bring you all the things you find useful about AGRIFOODSA and more. And, as always, my sincere thanks to everyone who contributed to this issue.

May your pockets be heavy, and your heart be light. May good luck pursue you morning and night.

SURVEY & DESIGN OF ALL IRRIGATION SYSTEMS,
DAM DESIGN REGISTRATION, DAM SEALS
AND ALL WATER RELATED STUDIES

PIVOT OPTIONS

TOWABLE SYSTEMS

- Movable or towable units are always moved in the direction of the machine itself. The movable pivot rides upon a trolley and the wheels can be set pointing perpendicular to the shaft, for movement.

PERMAPIPE

- The spans provide the solution for corrosion problems by lining the internal surface of its galvanized pipes with a high-density polyethylene (HDPE).
- Lined pipe with HDPE does not require gaskets between flanged pipes because of the unique mold-aflange technology, which makes sealing an integral part of the liner material.

For more information check Permapipe catalogue.

FERTIGATION EQUIPMENT

- Fertigation equipment comprises a dosing pump that can be regulated (percentage) and an electrical stirrer, together with the corresponding accessories for injecting the fertilizer into the main water flow.
- The most common flows for dosing pumps are 200, 300 and 500 litres/hour, although others are available.
- The system can be placed at the head of the water supply or the foot of the pivot.

iControlRemote

- It is a remote irrigation management product that uses GSM technology to monitor and manage your irrigation systems.
- iControlRemote.com website allows you to monitor the current status of your irrigation systems including current end pressure, speed percentage, angle, endgun, total hours running and total hours with water.

For more information check iControlRemote catalogue.

Hybrid Solar, Battery and Generator Facility

Grid Tied 436kWp Solar Plant Integrated with a 500/400 HV+ Battery System and a 800 kVa Generator Set

SunRanch.Solar

WHERE THE SUN NEVER SETS

Whether you're new to the world of solar power and searching for the best energy solution for your business, or already have a PV system installed, the addition of a Battery Energy Storage Solution (BESS) can make a tremendous difference in the efficiency and versatility of your electrical supply.

Technical Specifications:

- PV Panels – JA Solar 540w.
- PV Inverters: Solis 110kW Three Phase 5G.
- Battery Inverter: ATESS 500.
- Battery: Freedom Won 500/400 HV+
- Generator Set: 800 kVa.

Hot Buttons:

- The Hybrid Power System provides 80% of Primeco's energy requirements as a cost effective and reliable electricity source.
- "Globally, energy storage deployment in emerging markets is expected to increase by 40% each year until 2025." – ESI Africa.

Uses of BESS:

- Provide Ancillary Services - Short injections of energy to regulate frequency and voltage and adds to grid stability;
- Provide Power Services - Spare energy capacity when required;
- Used as Reliable Transmission Asset to avoid or delay building very costly infrastructure.

The only DAM liner with a 16 year guarantee

Flexi Linings manufacture and supply Corrugated reservoirs, Liners (for reservoirs, and cement and earth dams) and different roof options. Flexi Linings supplies the only 1000g liner (embossed with the weight and logo) in the country AND it has a 16 year guarantee!

Our PVC liners are reinforced with polyester base cloth and are the toughest, most durable, flexible liner on the market - they are NOT tarps!
Our guaranteed liners are black and contain UV stabilisers so the liners don't get brittle and last, despite prolonged exposure to the sun. All welding is done by a high-frequency welding process ensuring it remains waterproof.

Our linings are SABS tested, so you know that your liner is safe and reliable (with no cross contamination).
Flexi linings are safe for any use:

- protecting potable drinking water (safe for human and animal consumption or in dams containing fish). OR
- for reservoirs containing toxic waste or liquid fertiliser (to prevent pollution/ contamination of the surrounding environment).

Flexi Linings

Contact: (+27) 083 7777 670
info@flexilinings.com
www.Flexilinings.com

We manufacture and supply a wide range of different sized corrugated (Aluzinc) reservoirs that last a lifetime.
We also make corrugated roofs (or PVC or shade netting covers) to prevent water contamination and evaporation.
AND... we manufacture and install liners, perfectly measured and fitted (for your existing cement and/or earth dams.)

UNLEASH THE GREEN REVOLUTION!

WORLD FOCUS agri

Energy management using Innovative Technology.

World Focus Agri, a South African leader in Soil Remediation, Organic Chelated Leaf Nutrition, and Plant Energy Management.

Over the past thirteen years we've been serving small-scale and commercial farmers, building a strong market presence in South Africa, Namibia, Zambia, Mozambique, Botswana, and Malawi.

Product range

The World Focus Agri product range consists out of the following Soil Remediations;

Complex-range

Ultrafine Lime and Gypsum for easy application and rapid soil and plant availability. Packaging: 25kg, 1kg, 500g, 100g Foliar feeds.

Glio-range

Enhances growth and yield for all African produced crops, with specific products for different growth stages. Packaging: 5L, 1L, 500ml, 250ml.

Products developed for a wide range of flowers, plants, crops, all grain, deciduous fruit, apples, citrus, vegetables, sugarcane etc.

GROUP ECOCERT SOUTH AFRICA

www.ecocert.com

WHO AND WHAT IS ECOCERT?

ECOCERT is an organic certification organization, founded in France in 1991. It is based in Europe but conducts inspections in over 80 countries, South Africa as well, making it one of the largest operations of its kind in the world.

ECOCERT APPROVAL

Certification by Ecocert: what is it? It's a rigorous process that consists of an independent and impartial certification body assessing the conformity of a product, service or system with environmental and social requirements specified in a standard.

WHAT DOES ECOCERT APPROVAL MEAN?

It is certification according to the international COSMOS standard or the private Ecocert standard which enables the labelling of your natural or organic products. All the products marketed with the Ecocert logo have been verified by the Ecocert teams: from composition to processing and packaging.

For a product to be Ecocert certified, it needs to have a minimum percentage of organic ingredients, be at least 95% natural and not contain any harsh chemicals. World Focus Agri has twelve different products that is Ecocert certified. Certification also means that no residue of any hazardous chemicals will be found in the produce that was treated.

WHAT DOES THE ECOCERT CERTIFICATION OF THE WORLD FOCUS AGRI PRODUCTS MEAN FOR THE CONSUMER, THE GARDENER, THE FARMER AND THE OPERATOR OF THE APPLICATOR?

Well, an Ecocert certification means that the certified product is save to apply, it is also safe for the consumer (housewife) to use the vegetables, fruit, grain etc. that was treated with World Focus Agri products. The certified products are also safe for animals, it can be use indoors where household pets are present.

World Focus Agri was started fourteen years ago with the goal and purpose to create wealth to the African farming community, the products that the company develop, produce and distribute all over the Southern African countries are all organic based.

We now also entered the house hold market via nurseries. The products will be available in some of the larger nurseries all over Gauteng. For the commercial farmer we have agents all over South Africa and the rest of Southern Africa.

SOLAR NANO COATING

HYDRASOL is a high quality hydrophobic, self-clean nano solar panel coating.

HYDRASOL has very low surface energy, anti-stick character which prevents water, dust and dirt from attaching themselves to the surface. Any debris that settles on a solar panel will be blown away by die wind or carried away by water droplets which are strongly repelled from the surface.

The product requires no polishing or buffing. Simply wash off with clean water to produce a hard wearing, reduced stick, easy to clean, hydrophobic surface coating.

The novel breakthrough of HYDRASOL is to co-locate water repelled functional groups alongside active functional groups on nano-structured particles which bond to the resin matric, giving a tough durable and transparent coating.

The nano-particles are smaller than the wavelength of visible light and do not scatter light but providing a high degree of transparency.

FEATURES:

- Provides a hydrophophic layer which repels water away from the surface and keeping it dry.
- With a ceramic hardness of 9H+, it provides increased protection against hail.
- Can be applied pre or post installation of the solar panels.
- It is ecologically beneficial and biologically safe.
- It has a durability for up to 10 years.

BENEFITS:

- An easy to clean surface – less dirt and is far easier to clean.
- Optical neutrality of the surface is 100% retained.
- Protects from bird fouling and other heavy soiling sticking to the panel's surface.

SCAN ME

Jakaranda Kinderhuis

BECAUSE WE CARE

Louis Botha Kinderhuis

WHERE HEALING BEGINS

SCAN ME

We are a registered Children's Home managing two campuses in Pretoria, Jakaranda Kinderhuis in East Lynn and Louis Botha Kinderhuis in Queenswood where we care for school-going children placed in our care by the Children's Court.

With a maximum capacity of 327 children, aged between 3 – 18 years, we have 20 houses (max 225 children) at Jakaranda Kinderhuis and 9 houses (max 102 children) at Louis Botha Kinderhuis. Each of these homes have a dedicated houseparent who takes care of between 10 – 12 children in her / his home 24 hours a day, 7 days a week, 365 days a year. We provide them with therapy, medical care and a home where they can feel safe and loved. We also transport our children to and from 23 different schools daily, this includes pre-, primary-, high- and special schools.

The quarterly subsidy, we receive from the Department of Social Development lately only covers 43% of our expenses; for the difference we rely heavily on the community for support, involvement and donations.

One of the most pressing needs are comprehensive therapy services for the children. We firmly believe; and can testify to the positive results, that providing access to quality therapy can significantly contribute to their well-being and overall development.

Hence, we need funds for forensic assessment and socio-emotional assessment, when children are placed with us to determine the level of therapy needed for each individual child. The specific types of therapy required and proved most beneficial for our children's unique situations includes long-term therapy such as speech-, language-, occupational-, behaviour- and group therapy.

Our vision is to raise **EMPOWERED ENABLERS** and break the cycle by placing well-developed individuals back into the community the day they leave the Children's Home, in order for them to make a difference in their respective communities.

By supporting us, your company will give back to the community, through an institution, that is effectively administered and we gladly issue a Section 18A certificate for donations received.

GOOD SOCKS

FOOTPRINTS OF YOUR HEART

Our children are involved in the Good Socks project and have designed cycling socks that are sold nationwide. In 2021, two cyclists invited the children at Jakaranda Kinderhuis to participate in a design competition for cycling socks. After receiving 38 different and highly creative designs, the cyclists selected four winning designs. These designs were used to manufacture the socks and were sold with a percentage of the profits going to the children's home. The two cyclists have since discontinued their business, and as a result, the Children's Home now receives 100% of the profits.

To order online, click on the link: https://jacarandachildren.co.za/good-socks/

FERTASA
Fertilizer Association of Southern Africa
FERTASA
CERTIFIED CREDIBILITY
www.fertasa.co.za
Reg. Nr. 1971/000012/08|VAT Reg. Nr. 4830104164

Fertasa and its members are committed to the promotion of sustainable soil fertility and enhanced plant nutrition.

Fertasa strives to provide information on fertilizer and crop related topics. Apart from assistance with fertilizer applications, queries relating to fertilizer usage, plant nutrition and soil fertility usage, plant nutrition and soil fertility are referred to our Technical Advisers or Subject Matter Specialists for their expert opinions and advice.

Member companies and others are encouraged to share their experiences in proven techniques and novel approaches in ensuring social, environmental and economic sustainability for all.

STRUCTURE OF FERTASA

Fertasa is managed and directed by a Board of Directors who are elected by and representative of the ordinary members. The Board of Directors report to the Members which comprise representatives from all ordinary and affiliate members. The Members appoint operational committees to attend to various aspects of the business of Fertasa.

PURPOSE

Fertasa is a recognised and preferred body aimed at promoting the image of the fertilizer industry through:

- Promoting the integrity of each Member and building preferential trust for their products and services.
- Enhancing and protecting the interest of its members through effective engagement with government and organised agriculture.

BOARD OF DIRECTORS

The Board of directors manages and directs the business and affairs of Fertasa. The Board comprises six (6) directors, and one (1) executive director (the Chief Executive Officer of Fertasa).

The directors are elected by the ordinary members with equal representation from both smaller and larger member companies.

CORE FUNCTIONS

- Actively promote the agro-economic and environmentally accountable fertilizer, bio-fertilizer and aglime practices;
- Develop a positive public awareness and acceptance of the need for fertilizer, bio-fertilizer and aglime use in food production;
- Improve the operating environment within which its constituent industries operate in a spirit of free enterprise and fair trade;
- Assimilate, adds value to and disseminates fertilizer, bio-fertilizer and aglime related information;
- Provide a discussion forum for its members and other parties on all aspects relating to fertilizer, bio-fertilizer and aglime distribution, agronomic advice and product quality.

We stand for the protection of the sustainable use of fertilizer.

WHO ARE WE?

- **A code of conduct.**
- **A set of standards audited by an independent compliance management body.**
- **Quality products.**
- **Relevant scientifically-based recommendations.**
- **Continual learning and improvement.**
- **Complying with all legal requirements.**
