Welcome to the April | May 2024 edition of the AGRIFOODSA Magazine.

As the world progresses into the digital era, the agricultural sector in South Africa stands on the brink of a transformative journey. With technology rapidly integrating into every facet of our lives, the relevance of agriculture in a digital age cannot be overstated. And NAMPO 2024, the 56th presentation of the Harvest Day from 14 - 17 May 2024 is geared to showcase the newest trends and developments on offer, with the AGRIFOODSA team at the frontline.

The theme "Agriculture in a Digital Age" echoes South African producers who increasingly recognise the significance of connectivity in driving efficiency, sustainability, and prosperity in farming practices. Harnessing the power of digital tools and platforms, farmers are unlocking unprecedented opportunities to enhance productivity, optimise resource utilisation, and improve livelihoods.

Our cover featured advertiser, Bruker South Africa, will also be exhibiting at NAMPO. Bruker's differentiated high-value life science research and diagnostics solutions enable scientists to make breakthrough discoveries and develop new applications that improve the quality of human life. They are a developer, manufacturer and distributor of high-performance scientific instruments and analytical and diagnostic solutions that enable their customers to explore life and materials at microscopic, molecular and cellular levels. To find out more about their products and services, go to [www.bruker.com](http://www.bruker.com).

Be sure to keep a close eye on our upcoming newsletter, competition page on the AGRIFOODSA.INFO website and all of our socials for exciting news and prizes up for grabs during and after NAMPO.

We're excited to see you there.

DRIVEN BY POSSIBILITY™

# GATES KEEPS YOUR MACHINES WORKING.

## ALL SEASON LONG.

PREMIUM QUALITY BELTS & HYDRAULIC ASSEMBLIES ASSURING RELIABILITY... EVEN IN THE TOUGHEST CONDITIONS.

# IF IT RUNS, GATES HELPS IT RUN BETTER

As a global leader in power transmission and fluid power products serving customers across various industries, Gates recognises the demands of agricultural machinery. Their Agricultural Solutions Programme offers a unique portfolio of belts & hydraulic solutions for a multitude of applications on combine harvesters and tractors.

### RELIABILITY IN THE TOUGHEST CONDITIONS

Gates belts are built to original equipment quality and ensure trouble-free and long-lasting service in the most demanding working conditions of farming machinery.

### LIGHTER, MORE FLEXIBLE AND EASIER-TO-HANDLE

Gates' innovative MXT™ hose is designed specifically to offer performance exceeding industry standards and to address your application challenges: lower equipment weight, easier hose assembly and less assembly time.

**With Gates you don't need to worry about unexpected breakdowns during the season any longer.**

**Contact us ([inforequest@gates.com](mailto:inforequest@gates.com)) and experience the comfort of a trouble-free replacement.**

DAM DESIGN REGISTRATION, DAM SEALS  
AND ALL WATER RELATED STUDIES

### PIVOT OPTIONS

#### TOWABLE SYSTEMS

- Movable or towable units are always moved in the direction of the machine itself. The movable pivot rides upon a trolley and the wheels can be set pointing perpendicular to the shaft, for movement.

#### PERMAPIPE

- The spans provide the solution for corrosion problems by lining the internal surface of its galvanized pipes with a high-density polyethylene (HDPE).
- Lined pipe with HDPE does not require gaskets between flanged pipes because of the unique mold-aflange technology, which makes sealing an integral part of the liner material.

For more information check Permapipe catalogue.

#### FERTIGATION EQUIPMENT

- Fertigation equipment comprises a dosing pump that can be regulated (percentage) and an electrical stirrer, together with the corresponding accessories for injecting the fertilizer into the main water flow.
- The most common flows for dosing pumps are 200, 300 and 500 litres/hour, although others are available.
- The system can be placed at the head of the water supply or the foot of the pivot.

#### iControlRemote

- It is a remote irrigation management product that uses GSM technology to monitor and manage your irrigation systems.
- iControlRemote.com website allows you to monitor the current status of your irrigation systems including current end pressure, speed percentage, angle, endgun, total hours running and total hours with water.

For more information check iControlRemote catalogue.

### OUR SERVICES INCLUDE THE FOLLOWING:

- Micro & drip designs
- Centre Pivot designs
- Pump stations, structural designs and fabrication
- Greenhouse and Irrigation designs
- Overhead Irrigation Systems (Tinkie)
- Electrical Designs
- Underground Drip Irrigation designs (SDI)

# The only DAM Liner with a 16 year guarantee

Flexi Linings manufacture and supply **Corrugated reservoirs, Liners** (for reservoirs, and cement and earth dams) and different roof options. Flexi Linings supplies the only **1000g liner** (embossed with the weight and logo) in the country AND it has a **16 year guarantee!**

**Embossed Liner**  
Flexi Linings 1000gsm  
SABS tested

Our PVC liners are reinforced with polyester base cloth and are the toughest, most durable, flexible liner on the market - they are NOT tarps!

Our guaranteed liners are black and contain UV stabilisers so the liners don't get brittle and last, despite prolonged exposure to the sun. All welding is done by a high-frequency welding process ensuring it remains waterproof.

Our linings are SABS tested, so you know that your liner is safe and reliable (with no cross contamination). Flexi linings are safe for any use:

- protecting potable drinking water (safe for human and animal consumption or in dams containing fish). OR
- for reservoirs containing toxic waste or liquid fertiliser (to prevent pollution/ contamination of the surrounding environment).

**We manufacture and supply a wide range of different sized corrugated (Aluzinc) reservoirs that last a lifetime.**

**We also make corrugated roofs (or PVC or shade netting covers) to prevent water contamination and evaporation.**

**AND... we manufacture and install liners, perfectly measured and fitted (for your existing cement and/or earth dams.)**

# NANOTEK ULTIMATE COATINGS

WE DELIVER ANYWHERE  
IN SOUTHERN AFRICA

INCREASE SOLAR PANEL  
PERFORMANCE BY UP TO 15%

**HYDRASOL**  
SOLAR NANO COATING

HYDRASOL is a high quality hydrophobic, self-clean nano solar panel coating.

HYDRASOL has very low surface energy, anti-stick character which prevents water, dust and dirt from attaching themselves to the surface. Any debris that settles on a solar panel will be

blown away by die wind or carried away by water droplets which are strongly repelled from the surface.

The product requires no polishing or buffing. Simply wash off with clean water to produce a hard wearing, reduced stick, easy to clean, hydrophobic surface coating.

The novel breakthrough of HYDRASOL is to co-locate water repelled functional groups alongside active functional groups on nano-structured particles which bond to the resin matrix, giving a tough durable and transparent coating.

The nano-particles are smaller than the

wavelength of visible light and do not scatter light but providing a high degree of transparency.

**FEATURES:**

- Provides a hydrophobic layer which repels water away from the surface and keeping it dry.
- With a ceramic hardness of 9H+, it provides increased protection against hail.
- Can be applied pre or post installation of the solar panels.
- It is ecologically beneficial and biologically safe.
- It has a durability for up to 10 years.

**BENEFITS:**

- An easy to clean surface – less dirt and is far easier to clean.
- Optical neutrality of the surface is 100% retained.
- Protects from bird fouling and other heavy soiling sticking to the panel's surface.

## WHO AND WHAT IS ECOCERT?

ECOCERT is an organic certification organization, founded in France in 1991. It is based in Europe but conducts inspections in over 80 countries, South Africa as well, making it one of the largest operations of its kind in the world.

## ECOCERT APPROVAL

Certification by Ecocert: what is it? It's a rigorous process that consists of an independent and impartial certification body assessing the conformity of a product, service or system with environmental and social requirements specified in a standard.

## WHAT DOES ECOCERT APPROVAL MEAN?

It is certification according to the international COSMOS standard or the private Ecocert standard which enables the labelling of your natural or organic products. All the products marketed with the Ecocert logo have been verified by the Ecocert teams: from composition to processing and packaging.

For a product to be Ecocert certified, it needs to have a minimum percentage of organic ingredients, be at least 95% natural and not contain any harsh chemicals. World Focus Agri has twelve different products that is Ecocert certified. Certification also means that no residue of any hazardous chemicals will be found in the produce that was treated.

## WHAT DOES THE ECOCERT CERTIFICATION OF THE WORLD FOCUS AGRI PRODUCTS MEAN FOR THE CONSUMER, THE GARDENER, THE FARMER AND THE OPERATOR OF THE APPLICATOR?

Well, an Ecocert certification means that the certified product is safe to apply, it is also safe for the consumer (housewife) to use the vegetables, fruit, grain etc. that was treated with World Focus Agri products. The certified products are also safe for animals, it can be used indoors where household pets are present.

World Focus Agri was started fourteen years ago with the goal and purpose to create wealth to the African farming community, the products that the company develop, produce and distribute all over the Southern African countries are all organic based.

We now also entered the house hold market via nurseries. The products will be available in some of the larger nurseries all over Gauteng. For the commercial farmer we have agents all over South Africa and the rest of Southern Africa.

ESAB®

## Renegade VOLT™

Powered by DEWALT®

ESAB Renegade VOLT™ ES 200i is a portable, cordless battery powered, Stick (SMAW) and Live TIG (GTAW) welder with the versatility to operate in Battery, Mains, or AMP+ Hybrid Mode.

This cordless welder runs on 6 Ah, 9 Ah, and 12 Ah DEWALT® FLEXVOLT® batteries. Renegade VOLT™ provides the power to burn up to 33 (E6013) electrodes on a single charge using four 12 Ah batteries, that are included in the package.\*

Renegade VOLT™ is a highly portable and powerful unit perfect for mobile welders operating in remote, offsite, or hard-to-reach locations without easy access to AC mains power.

In AMP+ Hybrid Mode, Renegade VOLT™ supplements AC mains power with battery power to prevent nuisance trips on smaller breaker sizes (e.g., 10A, 16A) or to provide more output when welding on 120V input.

Renegade VOLT™ features a rugged industrial design with durable, impact-resistant housing and multiple lift points for easy operation and transport in the field. The bright, intuitive color-screen user interface is designed for outdoor use, even in direct sunlight, and features a battery status display and remaining arc time calculator.

This powerful welder offers the highest arc quality with special features that include hot start, arc force, memory storage, and cellulose mode (6010) to optimize performance based on application or user preference.

\* based on standard operating conditions

- 200 A output on AC mains (230V)
- Up to 140 A output on battery power
- Includes (4) DEWALT FLEXVOLT 20V/60V max 12 Ah batteries
- AMP+ Hybrid Mode for extra power
- Lightweight and portable battery powered welder
- Durable, impact-resistant housing
- Sun-friendly, intuitive user interface
- Memory storage for welding parameters

## SUPPLIERS OF PLANT BAGS AND WEED MATS

WE LISTEN TO OUR CUSTOMER

MADE TO YOUR SPECIFICATION

SEVERAL SIZES AVAILABLE

BAGS ARE PROVEN

BAGS ADD VALUE

FAST ROI

### Our Bags are better:

Our bags are more durable with reinforced seams and stitched corners. With care you can get several seasons out of them, making them better value as well.

Polypropylene fabric allows plant roots to breathe and ensures good drainage with less temperature variations at root level. There are several sizes of bags available, designed to suit specific crops.

Our plant bags are preferred by many, i.e. Amaloba, Bushketeers, Tree Traders, landscapers, tree growers, cycad growers, cannabis, and undercover farmers of vegetables, herbs and spices. You can read the references from our customers on our website.

Our bags will add value to your business. Quick ROI through better growth, less time to production and better yield. With the increase in production, the bags pay for themselves.

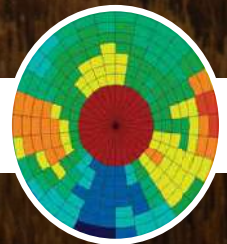

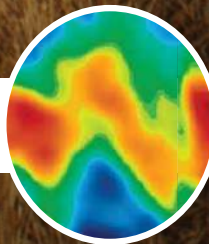

Tree Bags keeps close contact with our clients - we exchange information about the client's experiences with our bags, the results and successes achieved. Support from Tree Bags is hard to beat, if not unequalled.

Holland.

Landbou [holland.co.za](http://holland.co.za)

Disclaimer: Hollard Insurance Company Limited (Reg. No. 1932/00004/06) is a member of the Financial Services Board of the Republic of South Africa. All services are subject to the terms and conditions of the relevant policies issued by Hollard.

We are a registered Children's Home managing two campuses in Pretoria, Jakaranda Kinderhuis in East Lynn and Louis Botha Kinderhuis in Queenswood where we care for school-going children placed in our care by the Children's Court.

With a maximum capacity of 327 children, aged between 3 – 18 years, we have 20 houses (max 225 children) at Jakaranda Kinderhuis and 9 houses (max 102 children) at Louis Botha Kinderhuis. Each of these homes have a dedicated houseparent who takes care of between 10 – 12 children in her / his home 24 hours a day, 7 days a week, 365 days a year. We provide them with therapy, medical care and a home where they can feel safe and loved. We also transport our children to and from 23 different schools daily, this includes pre-, primary-, high- and special schools.

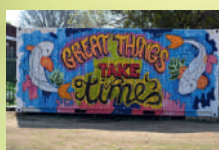

The quarterly subsidy, we receive from the Department of Social Development lately only covers 43% of our expenses; for the difference we rely heavily on the community for support, involvement and donations.

One of the most pressing needs are comprehensive therapy services for the children. We firmly believe; and can testify to the positive results, that providing access to quality therapy can significantly contribute to their well-being and overall development.

Hence, we need funds for forensic assessment and socio-emotional assessment, when children are placed with us to determine the level of therapy needed for each individual child. The specific types of therapy required and proved most beneficial for our children's unique situations includes long-term therapy such as speech-, language-, occupational-, behaviour- and group therapy.

Our vision is to raise **EMPOWERED ENABLERS** and break the cycle by placing well-developed individuals back into the community the day they leave the Children's Home, in order for them to make a difference in their respective communities.

By supporting us, your company will give back to the community, through an institution, that is effectively administered and we gladly issue a Section 18A certificate for donations received.

**GOOD SOCKS**  
FOOTPRINTS OF YOUR HEART

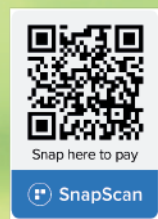

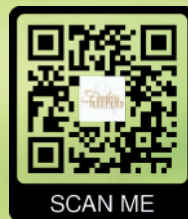

Our children are involved in the Good Socks project and have designed cycling socks that are sold nationwide. In 2021, two cyclists invited the children at Jakaranda Kinderhuis to participate in a design competition for cycling socks. After receiving 38 different and highly creative designs, the cyclists selected four winning designs. These designs were used to manufacture the socks and were sold with a percentage of the profits going to the children's home. The two cyclists have since discontinued their business, and as a result, the Children's Home now receives 100% of the profits.

To order online, click on the link: <https://jacarandachildren.co.za/good-socks/>

# The Southern African Grain Laboratory NPC

The Southern African Grain Laboratory NPC is an independent ISO/IEC 17025 accredited laboratory, acting as reference laboratory for the South African Grain Industry.

The **Crop Quality Division** focus on grain and oilseed quality analyses:

- Grading & Milling
- Nutritional analyses
- Rheology & Baking
- Vitamins, Minerals & Amino Acids
- Mycotoxins

The **Crop Protection Division** is also ISO/IEC 17025 accredited and OECD GLP Compliant for analyses on plant protection products:

- 5-batch testing
- shelf-life testing
- quality control

# FERTASA

Fertilizer Association of Southern Africa

**FERTASA**  
**CERTIFIED CREDIBILITY**

[www.fertasa.co.za](http://www.fertasa.co.za)

Reg. Nr. 1971/000012/08|VAT Reg. Nr. 4830104164

# Fertasa and its members are committed to the promotion of sustainable soil fertility and enhanced plant nutrition.

Fertasa strives to provide information on fertilizer and crop related topics. Apart from assistance with fertilizer applications, queries relating to fertilizer usage, plant nutrition and soil fertility usage, plant nutrition and soil fertility are referred to our Technical Advisers or Subject Matter Specialists for their expert opinions and advice.

Member companies and others are encouraged to share their experiences in proven techniques and novel approaches in ensuring social, environmental and economic sustainability for all.

## STRUCTURE OF FERTASA

Fertasa is managed and directed by a Board of Directors who are elected by and representative of the ordinary members. The Board of Directors report to the Members which comprise representatives from all ordinary and affiliate members. The Members appoint operational committees to attend to various aspects of the business of Fertasa.

## PURPOSE

Fertasa is a recognised and preferred body aimed at promoting the image of the fertilizer industry through:

- Promoting the integrity of each Member and building preferential trust for their products and services.
- Enhancing and protecting the interest of its members through effective engagement with government and organised agriculture.

## BOARD OF DIRECTORS

The Board of directors manages and directs the business and affairs of Fertasa. The Board comprises six (6) directors, and one (1) executive director (the Chief Executive Officer of Fertasa).

The directors are elected by the ordinary members with equal representation from both smaller and larger member companies.

## CORE FUNCTIONS

- Actively promote the agro-economic and environmentally accountable fertilizer, bio-fertilizer and aglime practices;
- Develop a positive public awareness and acceptance of the need for fertilizer, bio-fertilizer and aglime use in food production;
- Improve the operating environment within which its constituent industries operate in a spirit of free enterprise and fair trade;
- Assimilate, adds value to and disseminates fertilizer, bio-fertilizer and aglime related information;
- Provide a discussion forum for its members and other parties on all aspects relating to fertilizer, bio-fertilizer and aglime distribution, agronomic advice and product quality.

**We stand for the protection of the sustainable use of fertilizer.**

## WHO ARE WE?

- A code of conduct.
- A set of standards audited by an independent compliance management body.
- Quality products.
- Relevant scientifically-based recommendations.
- Continual learning and improvement.
- Complying with all legal requirements.
