EDITOR'S LETTER

It gives us great pleasure to present to you the June | July 2020 edition of the AGRIFOODSA Magazine.

In this 64-page edition we have on offer more than 66 advertisers spanning 50 categories for your perusal.

Our cover featured advertiser for this edition is Reinke South Africa. Richard F. Reinke, founder of Reinke Manufacturing Co., Inc., was a pioneer in the irrigation industry. Many of his innovations he conceived have become standards for the industry throughout the world. Today, most mechanized irrigation systems incorporate many of the concepts, inventions and patents he introduced during his lifetime. So, the next time you see a centre pivot effortlessly moving around the field, you can thank Richard Reinke for that.

In this day and age, Reinke offers a selection of 5 different types of water pipes, along with several different span lengths and diameters for every custom water application condition. With years of experience working with alternative materials, they will provide you with knowledge and expertise to ensure the best pipe material is selected to meet your irrigation needs. To find out more about their products and services, visit www.reinke.com.

Be on the lookout for our monthly AGRIFOODSA Newsletter, featuring our digital magazine, informative articles, exciting competitions and more. To sign up to our newsletter, contact info@agrifoodsa.info.

Also be sure to head on over to our AFSA Facebook page (www.facebook.com/agrifoodsa) for more competitions, funnies, Advertiser Showcases and recipes, as well as helpful and informative articles uploaded on the daily.

Lastly, we'd like to introduce to you the latest member of the AGRIFOODSA team, Ilse Potgieter, who will be the new point of contact for all account enquiries. Ilse has an impressive résumé, including many years of financial and administrative management, and we are confident that she will be a great asset to us. Welcome Ilse!

Warmest regards,

Chantell de Bruin

Knowledge grows

Verbind tot 'n wêreld
sonder voedseltekort ...
respek vir ons planeet.

As wêreldklas spesialiste in en verskaffers van anorganiese voerfosfate, aanvullings, konsentrate en voedingsgebalanseerde veevoer, streef Yara daarna om deur plaaslike kennis, internasionale kundigheid en deurlopende tegniese advies, kwaliteit en produktiwiteit, die voorste verskaffer van volhoubare gewasvoeding- en veevoeroplossings te wees wat die winsgewendheid van produsente ondersteun.

Met 'n toenemend groeiende wêreldbevolking, bly ons verantwoordelikheid om die wêreld te voed en die planeet te beskerm, ten spyte van ekonomiese hindernisse, beperkte bewerkbare grond en skaars hulpbronne.

Om sterk verhoudings met ons kliënte te smee, om in mekaar te belê en vertrou op te bou, lei tot volgehoue sukses, want ons glo ... deur saam te werk, kan ons 'n werklike verskil maak.

www.ltgfreight.co.za

**WE DELIVER A SUPERIOR AND PERSONALISED
FREIGHT AND LOGISTICS SERVICE**

LTG Logistics Transport Globally (PTY) Ltd is a South African freight forwarding & clearing company based in Gauteng with its headquarters in Rosslyn. It is thus part of a highly competitive logistical industry in which many multi-nationals / global forwarders participate.

LTG was established in 2006 with the main focus to serve the automotive industry. This meant that the company had to abide to the dynamics of this very competitive market, which is cost efficiency, reliability and flexibility. With the extensive knowledge and experience gained in the automotive supply chain, LTG has since expanded their offering into the mining, engineering, agricultural, perishable, general and other industries.

With an extensive range of clients and managing all modes of freight, from sea- and airfreights, imports and exports, local and cross-country distributions, LTG has become a noticeable competitor in the logistical environment.

Above reputation has subsequently led to LTG becoming an important external partner of BMW SA in Rosslyn in that their warehouse is used for additional storage of parts and two global suppliers for the BMW X3 program are using their facility to perform some value

adding processes.

The passion, dedication and fully understanding the client's needs, has put the employees on the forefront of the LTG success. The availability to support has no boundaries and teamwork is expressed daily with belief, honour and respect towards each stakeholder.

At LTG client service is the key factor to retain its client base. Each client is treated as if it's the only one LTG has, ensuring that a strong relationship is built by attending to the client's unique situation and requirements. LTG makes a point of visiting clients regularly and developing personal business relationships.

Communication is key, whether it being a compliment or complaint, the reaction will be in a professional manner to resolve any issues without delay. All visits are recorded on the company's CRM system and follow ups are done on a regular basis. This also allows LTG to continuously improve processes to deliver better results.

With above characteristics in place and adding their BBBEE Level 2 compliance as well as their ISO 9001 certification, LTG is a "must have" on your supplier list!

**TO LTG YOU ARE NOT JUST A NUMBER,
YOU ARE A VALUED BUSINESS PARTNER!**

SAADBEHANDELING MET ecoANALYTICS

Nemex is ontwikkel as 'n saadbehandeling met 'n verskeidenheid mikrobies en mikro-elemente. Die gebruik van Nemex help u plante nie net om vinniger te ontkiem nie, maar help ook om die wortelmasse en gemiddelde opbrengs te verhoog. Omdat Nemex al aan die wortelsone is, terwyl dit ontkiem, kan die vrylewende stikstofbinders met die aanvang van die werk begin, namate die wortels ontwikkel om u plante lewe te gee.

Toepassing is uiters maklik en dit is nie nodig om 'n soort kleefmiddel te meng of te gebruik nie. U skeur die verpakking net oop en voeg 50g per 25kg saad of 100g per 25kg fyn saad by. Teen rondom R100,00 per 50g behandeling kan dit net 'n oorwinning in u guns wees.

BESPROEÏNG EN WATERBESTUUR-OPLOSSINGS

ONS BLAAS LEWE IN ENIGE BESPROEÏINGS-PROJEK

TMI Irrigation Solutions is 'n nasionale besproeiings spesialis sedert 2000 en ons spesialiseer in "Turnkey Solutions".

www.plusnetgeotex.co.za

PLUSNET

SHADE NET PROTECTS YOUR VALUABLE AGRICULTURAL INVESTMENT IN MANY WAYS

WWW.PLUSNETGEOTEX.CO.ZA

Greenhouse farming initially entailed glass houses with hydroponics systems to prolong the production cycle and obtain even quality, amongst others. When shade net production came into being for car ports and other usages, all of a sudden the light went up for greens, berries, table grapes, cherries, citrus, figs, flowers and nut producers that required protection against the harsh South African sun, severe hail storms, wind chafing and birds.

Much research went in the different types and colours of shade net as it has a direct effect on the particular crop it covers. Today, PlusNet is one of the foremost shade net

manufacturers that cater for agriculture, industry, homes and even camping equipment. The percentage of a shade net denotes its translucency and its colour has an effect on a particular crop or application. PlusNet's 40% shade net is specifically manufactured for the agricultural sector and is more suitable for all vegetable types.

The darker the net, the more shade it provides. Most plants do not fare well under darker nets as there is diffused sunlight, so very little photosynthesis takes place which means little growth. Under a 40% net, depending on the colour, various types of fresh produce grow and

produce excellent.

Advantages of Undercover Fruit Farming:

Covering orchards with low-percentage shade nets, like PlusNet's 20% agricultural shade net can significantly improve the performance of the orchard / vineyard. Part of the responses can be attributed to the filtering of the light spectrum by the nets, and part is due to physical protection and creating a friendlier micro-climate. Improved external fruit quality is insured because of less sun burns and wind scars, smoother skin and better colouring. Furthermore, the low percentage shade nets reduce heat/chill stresses, offer enhanced photosynthesis and, importantly, better/less water usage.

PlusNet products offer hazard Protection which include protection from excessive solar radiation, protection from environmental hazards (wind, hail, sand-storms and ice rain) and protection from flying pests (birds, fruit bats and insects).

Every roll of PlusNet shade net carries a ten year guarantee against sun degradation.

For further information on your particular shade net requirements, please get in touch with PlusNet at: +27 (0) 11 412 3954 or at nets@plusnet.co.za

Looking for **QUALITY AIR RELATED** products?

We are focused on the distribution and wholesale of these products.

Air Service Centre is focused on the installation, maintenance and repair of high quality air products and systems. It is our aim to assist our customers in such a way to enhance their operations and productivity while promoting a safe working environment.

Air Service Centre is a registered agent for top international product brands. These include high quality and technologically advanced products that are energy efficient with low maintenance requirements to help reduce operational costs.

We provide a complete spectrum of Compressed Air products, Pneumatic and Vacuum systems, Coolers, Dryers as well as spare parts for all the products we install, with full backup from the brand manufacturer.

- Oil flooded screw compressors
- Water Injected screw compressors
- Reciprocating Compressors (Piston Compressors)
- Portable Diesel Compressors
- Oxygen Generators
- IVR (Variable Speed Drive) Compressors (with energy saving technology)
- Vacuum Pumps
- Air Dryers
- Blowers
- After Coolers

Total Pivot Management At Your Fingertips

Big technology on a compact screen

The Valley[®] ICON5 puts all your menu functions front and center. With simple soft-touch buttons and a touchscreen interface at the pivot point, you can control your center pivot with precision. The ICON5 gives you robust technology in a compact screen.

Key Features:

- 5-inch, full-color touchscreen display
- Intuitive user interface
- Soft-touch buttons for feature selection and navigation
- AgSense[®] built in – ICON Link installed standard*
- BaseStation3™ compatibility*
- Variable rate irrigation (VRI) capability
- Cable theft monitoring*

* Additional hardware or subscription required.

Smart Panels Made Easy[®]

End Gun Programming

VRI Speed Control Programming

Intuitive Control, Dynamic Display

The features you want. The quality you expect.

Entering commands and programs with the Valley, ICON10 is easy with the 10-inch, full-color touchscreen display. The intuitive graphical user interface shows the real-time status of the center pivot through easy-to-understand screens and icons. See immediate changes in bright, vivid colors. The ICON10 makes managing your pivot fast and easy.

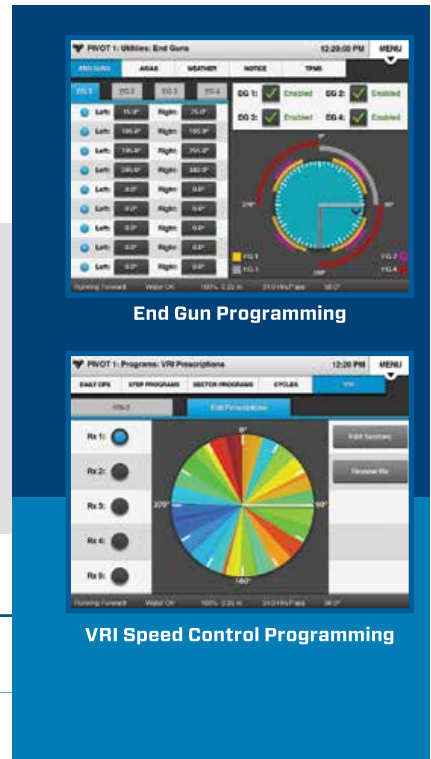

Key Features:

- 10-inch, full-color touchscreen display
- Intuitive user interface
- AgSense[®] built in – ICON Link installed standard*
- BaseStation3[™] compatibility*
- Variable rate irrigation (VRI)
- Cable theft monitoring*
- Remote Wi-Fi access** available through the ICON app

* Additional hardware or subscription required.
 ** Limitations based on distance and field conditions.

The world's most efficient pig breeding programme

DanBred Large White

DanBred Large White is one of the female breeds in the DanBred crossbreeding system. DanBred Large White is characterised by its good mothering abilities, and it produces large litters of uniform and vigorous piglets. Furthermore, DanBred Large White has a high daily gain, high feed efficiency and a good meat quality, which makes this breed extremely effective for the production of pork.

DanBred Landrace

DanBred Landrace is the other female breed in the DanBred crossbreeding system. DanBred Landrace has a high fertility and good mothering abilities, and it is known to produce large litters of robust pigs. Additionally, DanBred Landrace is a strong animal with solid legs and a high lean meat percentage.

DanBred Hybrid

DanBred Hybrid is a first cross between DanBred Large White and DanBred Landrace. It is the optimal dam line and the **most prolific hybrid** for production of optimal finishers, which ensures high efficiency in the production by combining the best traits. DanBred Hybrid has an even temper and excellent mothering abilities as well as a good longevity. The breed produces large viable litters of robust pigs, which grow fast and have a high feed efficiency all the way to slaughter, and when crossed with DanBred Duroc, the offspring will inherit all these traits as well as an excellent meat quality.

DanBred Duroc

DanBred Duroc is the **most competitive terminal sire** and is used in the DanBred crossbreeding system for production of DanBred finishers. DanBred Duroc contributes to large litters as well as fast-growing finishers with low feed conversion ratio and a high lean meat percentage. Furthermore, DanBred Duroc produces carcasses with an excellent meat quality, as the breed has been genetically improved through decades of targeted selection, especially in relation to lean meat percentage and slaughter loss. Our Duroc gives more pork for less money.

Reinke is currently the biggest privately-owned pivot manufacturer in the world. This American company expanded into Africa over the past few years.

The first shipment of Reinke warehouse stock arrived in August 2017. The Durban warehouse is used to keep stock for African farmers. When a farmer orders a new pivot, or spare parts for an existing Reinke product, the order is packed and sent from the Durban warehouse. The main goal of having a warehouse in Durban is to minimise the time that the farmer has to wait for his order.

Reinke South Africa can react and deliver effectively to any order in Africa. The main purpose of the Reinke Warehouse is to be able to react immediately on a client's demands.

Depending on the client's needs and size of the order, we can deliver to any farmer in South Africa within 24 hours, says Patrick Ellis, Director of Sales for Africa. "Orders from other African countries outside of South Africa can be packed and delivered within a week".

Reinke

IRRIGATION SYSTEMS

WWW.REINKE.COM

The whole warehouse is operated by a few well-trained staff members. When they receive an order, they promptly pack the different components into crates and load it onto a truck to deliver it on the farm.

There are six Reinke agencies in Southern

Patrick Ellis +27- (0)31-350-4525

SCAN ME

Africa. These agencies are not only equipped to help African farmers to plan their pivot irrigation, but they can also erect the pivots and provide technical support to farmers. Apart from the six agencies, Reinke also has marketers to introduce the products to the African agricultural market.

Paul van den Berg and Anton Lombard is the engineers at the Durban warehouse. They ensure that all the components of the pivots function correctly and they also provide technical advice to farmers and agents. A miniature version of a Reinke pivot is used in the warehouse to train the agents in the installation and fault finding of the pivots. They also provide training to Reinke agencies in other African countries.

Patrick Ellis is the Director of Sales for Africa and he says that with this facility they have been able to react immediately to complete pivot orders as well as parts orders. "Over the last two years our business in Africa has grown tremendously and we are here to stay!"

Reinke prides itself in the innovative design of the pivot structure to cut down on maintenance and operation costs, and to increase the lifespan of the irrigation system.

GROW BAGS

Sizes:

- 10L
- 15L
- 20L
- 30L
- 50L
- 100L

Grow bags are made from a breathable geotextile material that allows more air to the soil and drains excess water, keeping the soil moist for healthy roots and plant growth. Grow bags have less of an environmental impact than plastic pots do. This makes fabric pots ideal for high-performance feeding. For indoor crops as well as outdoors. We manufacture grow bags in a white and black material.

NON-WOVEN, BREATHABLE GEOTEXTILE MATERIAL.

- UV PROTECTED
- REUSABLE
- WASHABLE
- AIDS IN SOIL AND ROOT AERATION
- EXCELLENT DRAINAGE
- MORE OXYGEN MEANS HEALTHY SOIL
- PROMOTES ROOT PRUNING

THE BENEFITS OF HEMICELL™ HT

Easy to digest

THE CHALLENGE

Poultry feed is a critical source of protein to fuel broiler growth however these diets also contain β -mannans that elicit an immune response in the gastro-intestinal tract. This impacts negatively on bird health.

THE SOLUTION

β -mannans
Cause a Feed Induced Immune Response (FIIR)^{1,2}

Hemicell HT
Contains β -mannanase which breaks down β -mannans⁶

Eliminates the Feed Induced Immune Response (FIIR)⁴

Reduces nutrient digestion³

Improves digestion and nutrient absorption⁷

Diverts energy away from growth to mount the immune response⁴

Improves energy efficiency⁷

Negative impact on bird growth and Intestinal Integrity⁵

Positive impact on Intestinal Integrity⁸

Reduces litter usage and feed costs to deliver greater financial returns

Increases feed costs

The addition of Hemicell HT to poultry diets has been proven to improve the health and welfare of broiler flocks

Hemicell HT. Energising their health and your profits

FERTASA

Fertilizer Association of Southern Africa

FERTASA, CERTIFIED CREDIBILITY.

**WE STAND FOR THE PROTECTION OF
THE SUSTAINABLE USE OF FERTILIZER.**

**FERTASA AND ITS MEMBERS ARE COMMITTED TO THE PROMOTION OF
SUSTAINABLE SOIL FERTILITY AND ENHANCED PLANT NUTRITION.**

Fertasa strives to provide information on fertilizer and crop related topics. Apart from assistance with fertilizer applications, queries relating to fertilizer usage, plant nutrition and soil fertility usage, plant nutrition and soil fertility are referred to our Technical Advisers or Subject Matter Specialists for their expert opinions and advice.

Member companies and others are encouraged to share their experiences in proven techniques and novel approaches in ensuring social, environmental and economic sustainability for all.

WHO ARE WE?

- A code of conduct.
- A set of standards audited by an independent compliance management body.
- Quality products.
- Relevant scientifically-based recommendations.
- Continual learning and improvement.
- Complying with all legal requirements.

Structure of Fertasa

Fertasa is managed and directed by a Board of Directors who are elected by and representative of the ordinary members. The Board of Directors report to the Management Committee which comprises representatives from all ordinary and affiliate members. The Management Committee appoints operational committees to attend to various aspects of the business of Fertasa.

Purpose

Fertasa is a recognised and preferred body aimed at promoting the image of the fertilizer industry through:

- Promoting the integrity of each member and building preferential trust for their products and services.
- Enhancing and protecting the interest of its members through effective engagement with government and organised agriculture.

Mission

To provide a credible platform to promote the responsible and sustainable use of fertilizers.

Vision

To be recognised as the representative voice for the fertilizer industry and as the stamp of approval for responsible and sustainable soil fertility and plant nutrition in Southern Africa.

Board of Directors

The Board of directors manages and directs the business and affairs of Fertasa. The Board comprises six (6) directors, and one (1) executive director (the Chief Executive Officer of Fertasa).

The directors are elected by the ordinary members with equal representation from both smaller and larger member companies.

Core Functions

- Actively promote the agro-economic and environmentally accountable fertilizer and aglime practices;
- Develop a positive public awareness and acceptance of the need for fertilizer and aglime use in food production;
- Improve the operating environment within which its constituent industries operate in a spirit of free enterprise and fair trade;
- Assimilate, adds value to and disseminates fertilizer and aglime related information;
- Provide a discussion forum for its members and other parties on all aspects relating to fertilizer and aglime distribution, agronomic advice and product quality.
