EDITOR'S LETTER

Welcome to the October | November 2020 edition of the AGRIFOODSA Magazine.

As South African awakes to the first weeks under level one lockdown, the dawn of victory is just on the horizon. In the face of the unexpected outbreak of Covid-19, the South

African farming community and service providers alike are fighting the battle with a great spirit of bravery, tenacity and mutual assistance, which will undoubtedly serve to injected positive energy into our Agricultural and related industries as 2021 is drawing closer. We are well aware that marketing and advertising has dropped down very low on the list of priorities whilst companies are struggling to keep afloat, but we are extremely grateful to our dedicated advertisers for the support shown to AGRIFOODSA.

Our cover featured advertiser for this edition is PlusNet/Geotex. PlusNet/Geotex proudly manufactures shade net, fibre, bhopa ski rope, mini tunnels and bird net for the agricultural, commercial, and civil industries. They have a fully integrated state-of-the-art production facility that produces innovated and attractive products, and offer nationwide delivery. To find out more about their products and services, go to www.plusnetgeotex.co.za.

In an effort to improve the experience of our readers and advertisers, we've appointed Louis de Bruin as AGRIFOODSA's new Marketing Manager. Louis adds a fresh take on client relations and great enthusiasm for the agricultural and secondary industries of South Africa. He has 13 years of sales experience with numerous prestigious accolades and vast successes to show for his dedicated efforts. His love of nature, avidity for fishing coupled with his congenial yet professional demeanour is sure to make for a prosperous future with AGRIFOODSA.

Be on the lookout for our monthly AGRIFOODSA Newsletter, featuring our digital magazine, informative articles, exciting competitions and more. To sign up to our newsletter, contact info@agrifoodsa.info.

Also be sure to head on over to our AFSA Facebook page (www.facebook.com/agrifoodsa) for more competitions, funnies, Advertiser Showcases and recipes, as well as helpful and informative articles uploaded on the daily.

Warmest regards,

Chantell de Bruin

NEW APPOINTMENTS AT FERTILIZER ASSOCIATION OF SOUTHERN AFRICA (FERTASA)

The Fertilizer Association of Southern Africa is proud to announce the appointment of the newly elected Chairperson and Vice Chairperson to the Board. Dr Nicole Hart was elected to the position of chairperson and Henk Le Roux as the deputy chairperson.

Dr. Nicole Hart
CHAIRPERSON

Nicole is a proud mother of two children, Rachel (7) and Matthew (4) and she is currently a Commercial General Manager in the International team at Omnia Fertilizer.

She has previously served as a Sales Director at Experse, an AECI company, where she gained 13 years of experience in the Agriculture Industry locally and internationally. She has extensive experience in leading sales teams, acquisitions and integrations, driving product development and directing research.

Nicole obtained her PhD in Chemistry at the University of KwaZulu Natal in 2005. She has 13 years' experience in fertilizer coatings and additives and nearly 3 years' experience in the AgriBio portfolio.

She has served as either Director or alternate Director on the Fertasa board since June 2013, and she has recently served as Chairperson of the Fertasa Technical committee.

Mr. Henk Le Roux
DEPUTY CHAIRPERSON

Henk le Roux is currently working at NWK in the position of senior manager Fertilizer and Projects. He is married to Elora and the proud father of two children Carlene and Stephen.

Over the past 20 years Henk has been involved at NWK in the liquid predisposition division and fertilizer marketing. He was also involved in the Retail and Mechanical divisions in the group.

Henk was born and raised in the Northern Cape and furthered his studies at the University of the Free State, UNISA and North West University. Agriculture has taken Henk around the country and many neighbouring countries.

"Agriculture is my passion, I am learning every day and with all the knowledge from Industry leaders, colleagues and Agri- friends in the fertilizer industry this career is the best I could have hoped for" Henk said.

**Terme en voorwaardes geld

BY SENTER360 IS ONS TROTS DAAROP DAT ONS NIE SLEGS PRODUKTE VERKOOP NIE, MAAR DAT ONS OOK LANGTERMYN VERHOUDINGS MET ONS KLIËNTE BOU DEUR 'n WAARDEPAKKET VAN UITSTEKENDE KWALITEIT EN DIENS TE VERSKAF

Die SENTER360 spilpunt wat sedert 1994 in Suid-Afrika ontwerp en vervaardig word, is bekend vir sy uitmuntende kwaliteit en sterkte bo industrie-standaarde. Vir meer as vyf-en-twintig jaar is ons al deel van die besproeiingsbedryf. Ons het groeiende besigheidsbelange in Suid-Afrika, Afrika en die res van die wêreld.

By SENTER 360 is spilpunte vir ons 'n passie. Juis daarom bou ons nie net 'n sterk en taai struktuur nie, maar ons bestee ook heelwat tyd en aandag aan die klein besonderhede wat 'n groot verskil in jou alledaagse lewe kan maak.

STRUKTURELE STABILITEIT

SENER360 se vakwerkysters is van pyp vervaardig wat ligter as die algemeen gebruikte hoekysters is. Dit bied ons die voordeel om twee stelle vakwerkysters meer per toring te gebruik wat sorg dat die struktuur buitengewoon sterk is.

Boonop het die pypstruktuur minder windweerstand en is dit die rede waarom SENTER360 spilpunte windsnelhede van 158 km per uur (in die veld gemeet) kan weerstaan sonder enige skade; weereens ook die rede waarom geen SENTER360 spilpunt in die onlangse stormwinde omgewaai het nie (die enigste fabrikaat wat bly staan het!). Standaard langer aandryfbalke, stewige toringstutte, stabiliseringstawe en diagonale dra by tot dié uitsonderlike standvastigheid.

INNOVERENDE BEHEERPANEELREEKS

Die beginsel van eenvoudige modulêre ontwerp, wat die grondslag van die hele SENTER360 spilpuntontwerp uitmaak, word ook op ons beheerpaneelreeks toegepas.

As "basiese" beheerpaneel gebruik SENTER360 'n paneel vergelykbaar met die top reeks van ander fabrikate. Dit het as standaard funksies aan/af-sit terugvoer as die spilpunt staan direkte mm verstelling posisiebepaling druk-aanskakel en laedruk skakeling kan deelsirkels en sektore met variërende mm op elke sektor besproei outomatiese omdraai met variërende mm met die omdraai skeduleringsopsies, en vele meer!

Alle SENTER360 panele kan met jou selfoon*, tablet*, rekenaar of basisstasie beheer word deur 'n vandie-rak Kommunikasie-eenheid van jou keuse (GPRS/selfoon-netwerk, Wi-Fi of radio-eenheid) op enige nuwe of bestaande** SENTER360 beheerpaneel in te prop.

Volle pompbeheer, VSD-beheer en terugvoer is ook beskikbaar op dieselfde stelsel.

*(Android, IOS en ander)

** (Ouer panele se beheer is beperk tot aan/af, mm verstelling, loop/staan terugrapportering)

"LAASTE SPUIT" OPLOSSING

Een van die meer algemene probleme met spilpunte is dat die laaste spuit geneig is om verstopt te raak. Ons het egter met 'n innoverende, dog eenvoudige oplossing vorendag gekom om die laaste spuit deurlopend skoon te hou. SENTER360 spilpunte word standaard toegerus met drukgereguleerde Komet Twister sproeiers teen 10 psi (0.7 bar) of opsionele 6 psi (0.42 bar) wat op hangtype gemonteer is. Dit verseker uitstekende waterverspreiding in selfs die uiterste klimaatstoestande.

SWAARDIENS RATKAS EN MOTORS

Die standaard aandrywing van die SENTER360 spilpunt bestaan uit 'n swaardiens wielratkas, met 'n gratis opsionele vyf jaar waarborg* wat deur 'n 0.56 kW (40:1) motorratkaskombinasie aangedryf word (30:1 en ander is opsioneel).

LTG- State-of-the-art Warehousing and Distribution Facilities.

LTG Logistics Transport Globally (Pty) Ltd., international freight management and supply chain company has warehouses and distribution centres in Rosslyn and Pomona.

The Rosslyn facility offers clients a floor space of 6000m² and storage capacity of about 9 000m³. It is run on a highly efficient information technology platform integrating sophisticated warehouse management systems. The warehouse was built to cater for the changing environment within the automotive, manufacturing and engineering industry.

The Pomona facility offers clients limited space but larger volumes can be accommodated on request. The warehouse is situated close to the OR Tambo International Airport which offers easy access to surrounding areas and depots.

The emphasis within the industry has moved to global purchasing, resulting in a higher demand

on the supply chain elements such as warehousing and distribution. Our warehouses are there to serve these needs and are ideally located in the industrial hearts of Rosslyn and the East Rand near major manufacturers and service providers.

In addition, LTG's in-house logistics experts offer a comprehensive supply chain service to assist you in making the best business decisions. We have partnerships with key service providers to negotiate the best rates and to manage any import and export logistical requirements.

LTG – for your warehousing, distribution, receiving, dispatching, inventory management, picking, packing, ticketing, crating and loading requirements.

Technopol SA, founded in 1993, is primarily involved in the manufacturing of Expanded Polystyrene (EPS) and value-added products based on EPS. We also manufacturer value added product using PIR and Rockwool. We specialize in creating innovative building solutions that are energy saving and environmentally friendly.

Our vision is to exceed customer expectations for quality, safety, sustainability, cost, delivery, value and to become the supplier — and inspirer — of choice for Expanded Polystyrene (EPS) blocks; EPS sheets; EPS cornice; Insulated ceiling solutions; Adhesives and Polymers and Roof solutions, through leadership and innovation.

Our LiteCel® range of Expanded Polystyrene foams find application in a hugely diverse range of applications from Void Filling, (Geolite®) covered with soil and concrete, Thermal Insulation cores for Wall Insulation products, (LiteCore® and Nuwall®), Floor Insulation and Roof and Ceiling Insulation, (LiteSpan®, PolyCool® and SuperCool®), special Agrément Certified IBT building system and decorative products.

At Technopol SA we provide purpose designed products to our customers that wish to construct with Innovative Building Technologies. All new buildings in South Africa must now meet the energy efficiency standards as set out in SANS 10 400 Part XA.

At Technopol we also want to see people impart energy efficiency and thermal comfort into their dwellings and businesses by presenting cost effective fit for purpose products to the market. We don't believe in a one-size-fits-all approach, but rather to provide the customer with a solution specific to their unique and diverse requirements.

We use best practise and proven methodologies to:

- Analyse the needs of our customers and resolve any problems that arise.
- Use the above analytical data, and facts to plot the best possible solution.
- Use a strategic approach to show the customer exactly how we can assist them to reduce their building costs and be more energy efficient.
- Show the customer a roadmap of how we can partner with them, in order to make sure that we continuously add value, and assist them to have an on-going and innovative approach to achieving their building objectives.

At Technopol SA we continuously strive to be at the forefront of pioneering the next level of value, and customer centric solutions to offer to the market. We don't change the customer's needs to suit our product; we tailor the solution to suit the customer's needs.

Technopol SA is committed to supporting the communities within which we operate. We believe in the practice of social responsibility and encourage similar behaviour in our employees and suppliers. We support the conservation of the physical environment and the prevention of pollution at our facilities; and as such our environmental commitments include:

- To constantly increase environmental consciousness and application in all personnel
- o achieve an environmentally friendly work place in order to promote Quality of Life for all employees.
- To constantly strive to reduce any negative environmental impact of our products and processes.
- To continue to invest in improved energy efficiency and energy conservation.
- To conserve natural resources through efficient use and careful planning
- To control the creation of waste and, wherever practicable, recycle materials and waste. Hazardous Waste and effluents will be disposed of in a safe and responsible manner.
- To eliminate or reduce as far as possible the release of emissions or any pollutant that may cause environmental damage.
- To assess new processes for possible negative environmental impact before introduction.
- To undertake regular environmental monitoring and auditing of our activities.
- To adapt to climate change and to ensure mitigation in respect of climate change.
- To protect the biodiversity and ecosystems.
- Life cycle thinking

To date, Technopol SA is the only Thermal Insulation Manufacturer in South Africa that has an Integrated Management System that is ISO 9001, ISO 14001 and ISO 45001 Standards certified.

Technopol SA has a team of trained specialists, engineers and technicians who have built the necessary portfolio of experience to provide suitable solutions to any project. Our employees are motivated and active problem solvers.

One of the factors critical to Technopol SA's success was its decision to distribute its products not only to the South African market, but also Namibia, Swaziland, Lesotho, Botswana, Zimbabwe and Zambia. At our plant in Springs, we undertake a number of rigorous quality checks on all our products in our own laboratory. Only after these checks have been completed will the products be distributed to our customers.

AFRICA'S LARGEST & LEADING PVC & PU GUMBOOT MANUFACTURER SINCE 1940

Wayne has been delivering consistently excellent and innovatively designed PVC and PU gumboots to the agricultural industry for 80 years.

Since 1940, we have focused on what we do best – gumboots, and gumboots alone – allowing us to emerge as specialists in our field and pioneers in both innovation and quality.

With over 60 styles, cuts and colours, boasting an array of safety features to suit the specific hazards of your industry, Wayne has the perfect gumboot for you.

Wayne gumboots are firm favourites in the agriculture and forestry industry, chosen for their uncompromised protection, quality and comfort.

When every drop counts – KSB water pumps is what you need.

Irrigation pumps are used to pump water from a lower to a higher level from which the water then flows through channels to the fields requiring irrigation (lift operation) or to raise it to the required pressure head so that it can be sprayed on the fields via piping systems (sprinkling). The heads involved range from approx. 1 m for normal lift operation to 40 m for sprinkling. In special cases, heads exceeding 100 m may be required.

The flow rate varies according to the area to be irrigated, the nature of the soil, the type of crop cultivated and the climate. A quantity of 1 to 2 litres per second and hectare can be assumed as a rough value for orientation.

CRYSTAL TECHNOLOGY

THE SOLUTION TO EFFECTIVE PEST CONTROL

Can you afford to farm without it?
Pest control has never been this easy

- Species specific and environmentally friendly, cost effective
- Control your pests simply by taking photos, the control is in your hands.
- From photos we can kill any pests on your farm anywhere in the world.
- Improve production and quality in an uncertain time at low cost.
- The only guaranteed pest control in the world and transmissions can be monitored on the farm.

YOU CAN NOW FARM IN AN ECO-FRIENDLY AND SUSTAINABLE MANNER

Agricultural **Shade Net**

This year, we celebrate 25 years in business

We would like to thank you, our clients, for your support throughout the years.

We look forward to working alongside you for the next 25 years!

Our Agri+ range:

Our Deco+ range:

For more information on our product range, contact us on

011 412 3954 or nets@plusnet.co.za

www.plusnetgeotex.co.za

PLUSNET

SETTING THE STANDARD IN THE SHADE NET INDUSTRY IN AFRICA

Plusnet/geotex a division of master plastics pty, is a gauteng based manufacturing company. Geotex was founded 25 years ago, in 1995 and the plusnet range was added in 2000. Today plusnet/geotex has a fully integrated state-of-the-art production facility that produces innovative products for the agricultural, commercial and civil industry.

AGRICULTURAL NET

PlusNet offers a comprehensive range of agricultural shade netting – known as Agri+ – ranging from 20% to 60% shade, tailored to improve spectral transmittance and provide the optimal lighting and protection for your crop. Covering orchards with low-percentage shade nets can significantly improve the performance of the orchard or vineyard. Part of the responses can be attributed to the filtering of the light spectrum by the nets, and part is due to physical protection and creating a friendlier micro-climate.

DECORATIVE NET

Our range of attractive and functional decorative shade cloths – known as Deco+ range – provide cover for your crops ranging from 80% to 90% shade and come in a variety of colours.

The PlusNet 80% decorative range is ideal for projects where you require more shade, such as car ports or lapa covers. The Deco+ range is perfect for camping with applications ranging from a privacy screen and ground sheet to a cover around your boma area. The 80% decorative net has a UV block of 80% and provides 76% shade.

The 90% decorative range manufactured by PlusNet is specifically made for the African

commercial market. We supply to hardware stores nationwide and from our factory store direct to the public.

BUSINESS

As the leading manufacturer of agricultural shade net, the PlusNet shade net product line will open up a spectrum of new and evolving opportunities for new product variants. Whether you provide shade net for vegetable tunnels, shade houses or creative 'green' initiatives, the wide range of PlusNet netting offers the client great opportunities at the best possible price.

MINI NET TUNNELS

Mini Tunnels are the quickest hassle-free infrastructure available when endeavouring to open a micro agricultural business. Net tunnels are the ideal portable, affordable do-it-yourself infrastructure for instant shade for your livestock or small gardening business. Shade tunnels come in various sizes and are simple to assemble.

The PlusNet Team is ready to assist you with your net-related queries or projects. For more information on the products, visit www.plusnetgeotex.co.za or contact us by email on nets@plusnet.co.za for your quote today.

Agri Solutions

Ctrack's tracking solutions help farmers save on costs and improve performance through better planning and decision making regardless of crop type, farm or fleet size. By providing critical information about your equipment, you can efficiently manage your assets, time and

money investment. Our suite of GPS tracking devices are built for the often rough and remote conditions in South Africa so you can rest assured that your agricultural equipment will always be properly monitored.

Features:

-  **Machine usage (operating hours)**
-  **Real-time alert (geo zones)**
-  **Pattern of use (direction when used)**
-  **Potential asset theft or tampering alerts**

Bell & Paton
 Plant, Grow, Live

Portable walk-in greenhouse tunnel for the home gardener

Self-sufficient food propagation has never been easier

Easy to construct

The entire greenhouse can be closed with dual, easy-use zips keeping the outside world separate from the cosy growing area.

Multiple roll-up windows equipped with insect netting to help control pests.

Available in 6 sizes

INCLUDED: -25mm galvanised steel poles for endoskeleton
 - UV treated, reinforced PE plastic roof to fit over poles
 - Dual zip, roll up door (front and back doors)
 - Roll up side windows with insect net
 - Full instructions and all tools required for construction
 Galvanised 25mm steel poles easily fit together.

• 3m long x 2m wide x 2m high = R4 080
 • 4.5m long x 2m wide x 2m high = R4 600
 • 4m long x 3m wide x 2m high = R5 150
 • 6m long x 3m wide x 2.5m high = R8 600
 • 10m long x 3m wide x 2.5m high = R11 499
 • 12m long x 3m wide x 2.5m high = R13 799

LIFESTYLE

ATLASWARE

-OUR STORY-

THE ABILITY TO TAKE A BRILLIANT IDEA AND TRANSFORM IT INTO SOMETHING YOU WON'T WANT TO LEAVE HOME WITHOUT, TAKES SOME DOING. AND THAT IS EXACTLY WHAT ATLASWARE HAS DONE BY INTRODUCING A FLASK THAT DOES WHAT IT SAYS IT CAN.

In the year 1987 Mr. Victor Kingston manufactured the first very Atlasware bottle in a small village outside Chennai (India). He left for Chennai by bus every morning to sell his bottles. He came home daily with a little more money to produce a little more bottles.

This process went on for about 15 years until he alone could no longer keep up with manufacturing and thus hired his own staff to help. And in the end, he is the owner of 3 distinguished factories in 3 different cities in India which today produce far more products than the Atlasware bottle.

The bottles are made of top quality 304 stainless steel. There is so much confidence in the product that it is guaranteed of its functionality for life.

Atlasware bottles were mainly distributed in India and Dubai in 2007. In 2008, while overseas we were introduced to this amazing product by friends who moved to Dubai. For the next 4 years the product was mentioned quite a lot in and around our circle and the list of potential customers grew rapidly.

In 2011, our friends decided to take the risk and make a business of it, they brought the first 6000 bottles by ship to South Africa. These bottles were all sold from the boot of a car, to friends, family and colleagues.

With the high demand for the product, distribution was initially done by individual agents who had to meet certain requirements to qualify. Today, Atlasware South Africa has already distributed more than 30 large containers and the products are now mainly distributed to various stores and agents across the country. Due to everyone jumping on the "healthier lifestyle" bandwagon, this is the ideal top quality gift for any occasion and it is BPA & rust free. Cold water stays cold for 24 hours and longer, even in the sun and hot drinks stay warm for 18 hours in the same bottle, so this is doubly effective. If the bottle falls it is possible that it can damage the exterior but never ceases to work.

There are 4 sizes available, 500ml, 700ml, 1 litre and 2 litres. The lids & seals can be replaced at a nominal amount if they are lost or damaged.

KEEPS WATER HOT FOR 18 HOURS AND COLD FOR 24 HOURS!

Atlasware is distributed all over South Africa and can be found at various outdoor shops as well as independent resellers. Find us on Facebook & Instagram @AtlaswareSA.

Cobb broiler performance breaks records at RCL FOODS

With the step change in the performance of the Cobb 500 broiler over the last couple of years, it is no wonder it is the broiler of choice for small and large scale farmers alike.

The bird is more efficient than ever producing record FCR's, ADG's and weights.

Congratulations to RCL FOODS farms on achieving superior performance with the Cobb 500 Broiler over the past 8 months delivering PEF's exceeding 450.

INDRINGING OPSPORING

WAT IS DIE PATHFINDER SISTEEM?

BEKOSTIGBARE, LANGLEWE, LANG AFSTAND, ONDERGRONDSE SEISMIESE SENSORS

VIR 'N DEMONSTRASIE

SMS DIE WOORD "PATH" NA 47052

sms kostes beloop R2.00

Of dit nou voetstappe of voertuie is, Pathfinder sensors is 24 uur per dag aktief. Dit word begrawe en kan dan tot 2 jaar aktief bly op 'n battery.

Dis bewys in gebruik vir die beveiliging van Amerikaanse militêre vorentoe uitvoer basisse en gevegsbuiteposte.

Pathfinder is nou ook beskikbaar vir kommersiële sekuriteitsdoeleindes en beveilig alles van bewaakte fasiliteite tot kritiese infrastruktuur, insluitend groot eienaars van eiendom en hul beleggings.

Om suksesvol te wees het 'n kriminele aanval twee faktore nodig - die verrassingselement en beweegbaarheid.

Pathfinder elimineer albei en maak dit moontlik om bedreigings vas te pen en te monitor lank voordat daar enige skade of besering aangerig is.

Pathfinder se data-oordragvermoë en lae kragverbruik maak dit moontlik vir sensors om ver vanaf die beveiligde besitting geplaas te word wat dan vroeë waarskuwing aan reaksie-eenhede verskaf om aanvalle te keer. Reaksie-eenhede kan ook bepaal presies waar die aanval begin is. Weet presies waar en wanneer die lyn gekruis is en maak dit vir jouself moontlik om onmiddellik te reageer.

Pathfinder se sensors gebruik 'n gepatenteerde radio frekwensietoestel om beweging so ver as 10 km vas te stel - en kan ook gebruik word om kameras, radar en hommeltuie te aktiveer.

SO WERK DIE SMS-LYN:

Indien 'n leser na hierdie artikel beseft Pathfinder is 'n absolute noodsaaklikheid, en die naam van die instansie het van wie hulle wil ondersteun, sms na 47052. Die sensors word by die persoon geïnstalleer, dan betaal Pathfinder R1000.00 per sensor van daardie klênt aan die instansie wat hy of sy wil ondersteun. En op daardie manier kan die instansie gaan hulp verleen waar hulle weet dit nodig is.

Indien daar nog geregistreerde instansies daar buite is wat sulke ongelooflike werk doen soos Beeld Kinderfonds, Kosmos Stereo en Toekomsvonk en hul wil ook betrokke raak by PathfinderZA se sms projek vir fondse, dan kan hulle net die webtuiste besoek by: www.pathfinderza.com en 'n e-pos stuur. Daar is tans nog 2 plekke beskikbaar.

Boere of besigheidseienaars wat 'n demonstrasie op hul perseel soek kan die woord "Path" sms na 47052 en daar sal kontak gemaak word om die nodige reëlings te tref.

ICON LUCERNE

'Icon' was developed by selection among survivors from old fields of 'Aurora'. Plants were selected on plant characteristics, superior fodder yield, reliable seed production and improved disease and pest resistance. In each cycle of selection plants with superior features were retained and others were eliminated before flowering

The Australian variety 'Aurora' has performed very well in New South Wales and Argentina. The aim was to produce a broadly adapted and high yielding variety by selection of superior plants from within a proven variety. Traditional breeding methods were used to develop 'Icon'.

Agronomic characters

Plants are moderately tall with semi-erect leafy stems. 'Icon' plants are moderately winter active (rating 7) with strong summer growth, vigorous recovery from cutting or grazing and good survival under grazing. It is early flowering with flowers varying from light to dark blue. In resistance to pests and diseases 'Icon' is superior to 'Aurora' (see table 1). Independent tests for levels of resistance in 'Icon' were conducted by Crop Characteristics Inc. MN, USA.

Table 1: Disease and pest resistance of 'Icon' and 'Aurora'

	SPOTTED APHID	BLUE APHID	PEA APHID	PHYTOPHTHORA	ANTHRACNOSE
ICON	HR*	HR	R	HR	S
AURORA	HR	MR	MR	R	MR

* HR – highly resistant, R – resistant, MR – moderate resistant and S - susceptible

To assess hay production potential two hay cuts were taken in a two year old stand. In the first cut 'Icon' out yielded 'Aurora' by 16% and in the second by 32%.

In a comprehensive trial established at Keith in South Australia, the performances of 28 varieties and elite lines were compared in an irrigated replicated field trial. The yield of 'Icon' over three hay cuts was 2.33 tonnes/hectare, 10% more than 'Aurora' and other comparable varieties (see below).

Icon 2.33 t/ha
 Aurora 2.12 t/ha
 Genesis 2.08 t/ha
 Sardi 7 2.05 t/ha
 LSD (5%) 0.27 t/ha

The above trials indicate the 'Icon' is clearly more productive and more pest and disease resistant than its parent variety 'Aurora'.

Icon is protected under Plant Breeders Rights.

Together we

Fostering confidence in South African Perishable Produce for over 90 years.

The Perishable Products Export Control Board (PPECB), South Africa's official certification agency for the export of perishable products, celebrates its 94th year of existence this year.

Established in 1926 out of a need for an authority to regulate the export of perishable products, the PPECB was originally mandated to determine which shipping companies would be used for export and which perishable products would enjoy priority when assigning space aboard vessels.

Since its establishment the PPECB's role has changed dramatically, however it remains a key role-player in the export of perishable produce from South Africa. Cold chain services provided by the organisation include the inspection and approval of equipment such as containers, specialised reefer vessels and cold stores; overseeing loading processes and en-route temperature management of produce. In addition, the PPECB has been appointed as a third party to act on behalf of the South African

Maritime Safety Authority (SAMSA) to approve shippers using method 2 to verify the gross mass of a packed and sealed container.

This is in line with the mandatory amendments to the International Convention for the Safety of Life at Sea (SOLAS) Chapter V1, Part A, Regulation 2 which came into force on 1 July 2016, placing a responsibility on shippers to provide the verified gross mass of a packed container to the carrier or their terminal representative prior to being loaded on board a ship.

In addition to delivering cold chain management services, since 1991 the PPECB has provided quality inspections on perishable products destined for export. Products approved for export carry the passed for export stamp, regarded as a symbol of quality assurance to clients and consumers around the world.

Furthermore, the PPECB's food safety services ensure that food business operators comply with the standards regarding food hygiene and food safety of regulated agricultural food products intended for export. The PPECB's laboratory also provides analytical services which include mycotoxin analysis, fats analysis, dairy testing and maximum residue level testing of pesticides in a myriad of matrices.

By combining over 90 years of expertise and a range of services the PPECB seeks to enhance the credibility of the South Africa export certificate and support its customers to become the preferred suppliers of perishable products world-wide.

For further information on the PPECB please visit www.ppecb.com or call 021 930 1134.

LEMAITRE
SAFETY FOOTWEAR

ONE WORKER
SUPPORTING
ANOTHER

  Follow us on Facebook & Youtube at Lemaitre Safety Footwear to find out more about how we support local industries

 **FROM ONE WORKER**
 **TO ANOTHER**

SOURCED AND
MANUFACTURED IN SOUTH AFRICA

www.lemaitre.co.za

LEMAITRE

For **30 years**, Lemaitre has supported South African workers with locally manufactured safety footwear, and responsible sourcing that supports local industries. Now more than ever, it's one worker supporting another as we boost the economy to get South Africa back on its feet.

We have implemented a four-stage process that ensures our entire operation is geared towards supporting the people and communities of this great country.

Local Procurement

South Africa is our home, so we earnestly support local SMEs by sourcing key components for our footwear from them. By doing so, we contribute to the local economy and ensure that more communities prosper.

Local Manufacturing

We believe in what we can accomplish locally. With over 400 employees, we are serious about job creation. Together, we produce proudly South African safety footwear that protects workers laying the foundations of positive change.

Local Distribution

Our safety footwear is in demand throughout Africa, so we use the capability of local companies to get it there. After all, South Africans have always shown the ability to go the extra mile.

Keeping workers safe every day across industries

By manufacturing and distributing safety footwear products of the highest quality, we are looking out for the hardworking people who are building a stronger South Africa. Lemaitre safety footwear is proudly manufactured by workers, for workers.

MAXECO RANGE

All-round safety for general working hazards.

RAPTOR RANGE

Be sure footed on not so solid ground.

APOLLO RANGE

Maximum slip resistance and grip.

PARABOLIC RANGE

Supportive soles that relieve aching feet.

OLI IS THE WORLDWIDE LEADER IN INDUSTRIAL VIBRATION TECHNOLOGY

MAKING BUSINESS SIMPLER FOR CUSTOMERS WHILE GOING GLOBAL WITH A FIRST-CLASS PRODUCT HAS PROVED SUCCESSFUL IN MAKING OLI THE WORLD'S TOP SELLING COMPANY OF ELECTRIC EXTERNAL MOTOVIBRATORS.

WHEN YOU NEED IT, WHERE YOU NEED IT

As a global player in industrial vibration technology, with three manufacturing sites and eighteen trading subsidiaries, it is OLI's goal to provide excellent value to our customers.

OLI has been committed to delivering high-quality market-orientated products since being founded in 1961, but is aware that excellent customer service is of pivotal importance. The OLI product is distributed in Southern Africa by its subsidiary in Gauteng, South Africa.

The OLI product meets the high demands of the South African climate. Its high-quality products and equipment that can withstand our harsh operating environment. As a strong believer in innovation, OLI is constantly striving to be ahead of the curve.

It is this drive for innovation that allows us to now offer stainless steel motors to industry for clean and efficient plant operation.

We also offer a range of flanged mounted electric vibrators, specifically designed to be retro-fitted to existing equipment in a number of industries and sectors.

Our other offerings - pneumatic hammers and linear pneumatic vibrators - reduces numerous material flow headaches in plants. Identifying the customers'

needs is a priority; achieving a partnership built on trust is the reward. By supplying competitive, high-quality products for wide-ranging applications, OLI combines performance and reliability by adapting to the ever-changing market.

The key centrepiece of OLI's business strategy is rapid stock delivery, any time, any place in the world. With its skilled competence and valuable knowledge of the industry, OLI is a credible expert when it comes to assistance in finding the most suitable solution to each individual customer's request.

As all OLI's products are market-orientated, this affords the company knowledge of numerous applications and industries.

WHEN YOU NEED IT, WHERE YOU NEED IT!
THE MISSION STATEMENT THAT GIVES OLI THE EDGE OVER ITS COMPETITORS

GLOBAL LEADER IN SILAGE MANAGEMENT

Based in Stellenbosch in the Western Cape, but deliver nationwide and in neighboring countries

Leading Edge started their business in 2009 and the majority of their clients are dairy farmers, which results in an array of areas where they can be of assistance. Their employees have over 25 years' experience and knowledge in the dairy industry. They attend international and national Dairy Expo's to keep abreast with new innovations. They strive to supply our clients with products and information where their needs arise. This can be anything from latex gloves to barn interior and silage covers.

PRODUCT RANGE:

- **Silostop®** - Excludes oxygen from bunkers, minimizing dry matter losses, reducing spoilage and improving aerobic stability, producing quality silage. Inferior quality covers are unable to prevent oxygen penetration which causes yeasts, mould and airborne bacteria to grow. Silostop® delivers excellent protection with no silage decay and subsequent losses. It is a multilayer, light and strong film, making it easy to handle. Its unique oxygen barrier properties are proven to be over 100 times more effective than conventional black polyethylene plastic.
- **Cow Welfare Flex Stall™** - The better the cows rest, the better they produce. And the best place to rest is in our flexible free stall.

The benefits of Flex Stall™:

- ✓ It's cow friendly. The cows are lying down faster than normal, which increases rest time and thereby increases daily cow milk production.
 - ✓ It's flexible so that the cow gets zero injuries, but still sturdy enough to guide the cow.
 - ✓ It's durable
- **Cow Welfare Flex Feed™** - Brings the freedom of grass fields into the barns. It is flexible barn equipment for the well-being of the cow. Cow Welfare Flex Feed™, is a revolutionary way to feed cows indoors. With a flexibility of 30°, the feed barrier follows the cow's movements and ensures that the cow is not going to get hurt. The flexibility at the same time gives the cow ability to reach longer out on the feeding table, which means that the cow will eat for a longer period without getting any injuries from the barn equipment.

engineering for a better world

FERTASA AND IT'S MEMBERS ARE COMMITTED TO THE PROMOTION OF SUSTAINABLE SOIL FERTILITY AND ENHANCED PLANT NUTRITION.

The Fertilizer Society of South Africa was established in 1959. It was restructured in 2014, when it became known as the Fertilizer Association of Southern Africa (Fertasa). The Association represents the fertilizer industry in Southern Africa, with its members producing, trading, blending and distributing fertilizer products across this region. Fertasa's purpose is to act as the recognised and preferred body that promotes the image of the fertilizer industry by:

- Promoting the integrity of its members and building preferential trust for their products and services;
- Enhancing and protecting the interests of its members through effective engagement with government and organised agriculture.

BECOME A MEMBER: The Company has three types of members:

- ordinary members,
- affiliate members and
- honorary members.

The Company is funded through membership fees which are paid by all members except for honorary members. Membership fees will be reviewed annually and submitted to the Management Committee for approval.

For more information on the Memorandum of Incorporation of the Fertilizer Association of Southern Africa or membership of the Association, contact us on general@fertasa.co.za.
