EDITOR'S LETTER

Welcome to the NAMPO 2018 edition of the AGRIFOODSA Magazine and much appreciation for picking up our March-May 2018 edition. Included in this 118-page issue is a selection of the most reputable and reliable product & service

providers in Agri & Food in Southern Africa.

One such advertiser, featured on the current cover, is Myburg Toerusting; manufacturers of the first-of-its-kind 6-top, in-line, heavy duty rake. Be sure to pay them a visit at stand G7b at NAMPO in a few weeks' time.

Grain SA's NAMPO Harvest Day is one of the largest agricultural exhibitions under private ownership in the southern hemisphere and the largest in South Africa. It takes place annually, just outside of Bothaville, in the Free State and this year it will be held 15 – 18 May.

The products and services that are displayed by the more than 650 exhibitors, establish the NAMPO Harvest Day as a remarkably diversified trade exhibition.

Visitors at the NAMPO Harvest Day 2018 will be able to buy entrance tickets online through the TicketPro website from March 2018.

The AFSA-team will be amongst the hordes of people at the show, so if you see us there, say hi! Also, check out the AFSA Website (<http://www.agrifoodsa.info>) and Facebook page for all our latest news.

Speaking of, if you haven't ventured over to the Agrifoodsa Facebook page (<https://www.facebook.com/agrifoodsa>) yet, give it a go. We have tons of select content like Boerate, Advertiser Showcases, recipes and funnies, as well as helpful and informative articles available for your perusal. Remember to check in on Saturday mornings at 08:00 for the theme photo competition where a Takealot.com voucher is up for grabs weekly.

We'd like to express our gratitude to all of our advertisers for their overwhelming support and also give a big thanks to you, the reader, for your continued patronage.

Safe travels there and back again.

THE PROFIT CENTER

CONDITIONING:

Take advantage of early harvest premiums, reduce yield loss and save money by drying your own grain.

MATERIAL HANDLING:

Speed through unload and get back into the field with a gentle and efficient GSI bucket elevator.

STORAGE:

Increase marketing flexibility and capture your best price when the time is right.

Farming is never easy. It's even tougher when the market's more bust than boom. Skip the line at the elevator and plan for profit with a complete grain system from GSI.

TURN YOUR OPERATION INTO A PROFIT CENTER. VISIT GSI.AFRICA.CO.ZA

WORLD WIDE LEADERS IN

ELEPHANT GRASS CARAJAS

- Carajas is an improved Banagras that can be established with seeds
- Selected for high dry matter production
- Quicker regrowth with higher protein
- This elephant grass has a good cold and drought tolerance
- Tasteful and digests well and used for grazing and silage making

PANICUM MAXIMUM - ARIES

- It is a perennial forage grass with tussocks
- Great tillering capacity
- Narrow hairless leaves and light green color
- The main characteristic of this cultivar remains on its regrowth capacity after grazing
- It is very well accepted by beef cattle, horses, sheep and goats.
- High protein with a 70% digestibility and highly palatable

PANICUM
MAXIMUM-
MOMBASA & TANZANIA

PANICUM MAXIMUM - MOMBASA AND TANZANIA

- High dry matter producer with excellent digestibility
- Recommended for intense grazing pastures
- Direct grazing, hay making and silage making
- Used by beef and dairy cattle producers

PANICUM MAXIMUM - PAREDAO

- New improved panicum variety that produces higher quality plants that produce up to 30% more than most panicum varieties
- plant have an excellent palatability with a high drought tolerance
- direct grazing and silage making
- Is recommended for milk and beef production

TROPICAL PASTURE SEED

BRACHIARIA BRIZANTHA- MG 4

BRACHIARIA BRIZANTHA - MG 4

- Improved Marandu that can handle poor soil with a high drought tolerance
- Utilize direct grazing and hay making
- Good regrowth after grazing
- Cold of tolerance higher than Marandu

Brachiaria Brizantha MG-5 MATSUDA GENETICS 5

Victoria

BRACHIARIA BRIZANTHA - MG 5 VICTORIA

- Yields higher than Marandu cultivar
- Good drought resistance
- Tolerates poorly drained soils
- Good regrowth after grazing
- Very good option for the beef cattle production

4 GAME MIX

4 GAME MIX

- Improved handling through increased flow capacity of the seed
- Better protection against insects
- Better protection against seedling rot
- Extremely suitable for grass-eating wildlife

HYBRID LEGUME JAVA

HYBRID LEGUME JAVA

- Java is a perennial twinning and creeping legume with stems
- Low demand in soil fertility
- Fixate up to 150 kg/ha Nitrogen per year
- Medium palatability which assures high persistence with high crude protein value
- Presents high persistence under grazing
- Very good seed producer setting seeds all year round

7 BORON STREET
PLATINUM IND. PARK
RUSTENBURG, 0299

Sustainability is in Our Sights.

KSB has been providing pumps and valves for more than 50 years to the farming community and other industries in South Africa. Our pumps and valves help farmers to get the water where it is needed. Whatever the agricultural application, KSB has the answer.

Irrigation pumps are used to pump water from a lower to a higher level from which the water then flows through channels to the fields requiring irrigation (lift operation) or to raise it to the required pressure head so that it can be sprayed on the fields via piping systems (sprinkling). The heads involved range from approximately 1 m for normal lift operation to 40 m for sprinkling. In special cases, heads exceeding 100 m may be required.

The Global Food Challenge

DOW AGROSCIENCES PARTNERS WITH YOU TO:

① ENABLE YOUR PROGRESS

Today's technology can help you continually improve your farm for the future. We can work side-by-side with you to help you fully realize the benefits of today's crop protection innovations and technologies.

② OPTIMIZE PRODUCTION

Growers need effective and innovative tools to manage insect pests, plant diseases and weeds that can diminish your yield, damage your crops, and affect food safety. Choosing the best products keep your crops healthy, productive and profitable.

**How Dow AgroSciences
is contributing to find
solutions for the
growing world**

Dow AgroSciences

3 KEEP YOUR LAND SUSTAINABLE

You want to take care of your land and your waterways to keep your farm productive for a long time, while doing your part to preserve the environment in your local community. We can help you manage resistant weeds, insect pests and plant diseases. Helping you deploy innovative management practices and support the health of your soil.

Dow AgroSciences is a global research and development company and a leader in the agro-chemical market. We are continuously developing solutions that balance human needs with the preservation of our environment.

PhosPro 17

That extra boost!

A phosphate-salt-trace mineral and protein supplement

With PhosPro 17, phosphorous as well as protein is supplemented to ensure optimal utilization of pasture!

PhosPro 17:

- Is weather resistant to prevent lick losses.
- Provides phosphorous in the form of highly available monocalcium phosphate.
- Is enriched with molasses by-products which gives the product a pleasant molasses smell and taste to ensure sufficient lick intake.
- Contains 17 % protein in the form of urea to ensure optimal grass intake.
- Contain all of the most important trace minerals in the correct ratio to phosphorous.
- Can be fed to cattle, sheep and goats during the summer.
- Can be used as a transition lick during the Autumn.
- Is ready mixed and can be fed to cattle, sheep and goats without any further mixing.

Innovative solutions in animal nutrition!

BASF is só toegewy aan boerdery

DERICK VAN DER WALT

Die chemiese reus BASF is en was nog altyd toegewy aan boerdery deur innoverende en tegnologieë gevorderde oplossings. Ceriax[®], hul innoverende swamdoder op kleingraan, is ook nou meer bekostigbaar.

Van die onlangse groot innoverende oplossings wat BASF bekend gestel het, sluit onder meer in Intelix[®], die revolusionêre vooropkoms-onkruidodder op verskeie gewasse; Ceriax[®], 'n innoverende nuwe swamdoder op koring en gars; en Sercadis[®], 'n beste-in-sy-klas swamdoder op kernvrugte.

BASF Gewasbeskerming het 'n globale benadering wat alle insette en terugvoer van boere, landbou- en plaagbestuurkundiges in ag neem. Met die bydrae en samewerking van alle partye is BASF in staat om 'n aktiewe navorsings- en ontwikkelingsruimte, 'n innoverende portefeulje van produkte en dienste, asook spanne en kenners in beide laboratoriums en in die veld, in stand te hou. Daardeur word verseker dat kliënte se ondernemings suksesvol is.

Die BASF Gewasbeskerming-afdeling het in 2017 sowat €507 miljoen belê in die navorsing en ontwikkeling van nuwe, innoverende oplossings.

Die toekomstige BASF-aanbod sluit die volgende innoverende oplossings in:

- Swamdoders:
- 'n Nuwe Xemium[®]-formulasie vir mielies.
- Revysal[®] in verskeie formulasies vir ry- en spesialiteitsgewasse.
- Onkruidodders:
- Addisionele Kixor[®]-oplossings wat boere sal ondersteun in die bestuur van moeilike onkruid.
- 'n Nuwe onkruidodder sal ook beskikbaar wees vir die beheer van grasse.
- Insekdoders:
- Inscalis[®], ontwikkel in samewerking met Meiji Seika Pharma Co Ltd – 'n unieke metode van werking-oplossing teen stekende en suigende insekte op verskeie gewasse.
- Broflanilide[®] in samewerking met Mitsui Chemical Agro Inc – 'n nuwe metode van werking (Groep 30 IRAC) wat boere sal help op kouende insekte te beheer, ook as 'n saadoplossing-behandeling.
- Publieke gesondheidoplossings:
- BASF gaan twee nuwe innoverende benaderings bekend stel vir die bekamping van malaria met Chlorfenapyr: 'n maklik-om-te-gebruik-oplossing, Interceptor[®] G2 ('n nuwe generasie van muskietnetje) en Sylando[®] 240SC ('n nawerkende-aksie-bespuiting vir die behandeling van binnemuurse omgewings, veral mure en plafonne).
- Plantvoedingoplossings:
- Geleentheid vir stikstofstabiliseerders soos

Limus[®], wat binnekort bekend gestel gaan word in Europa, Afrika en Suid-Amerika.

BASF Gewasbeskerming Suid-Afrika: Toegewy aan boerdery

BASF Gewasbeskerming Suid-Afrika het sedert 2011 sy belegging in plaaslike landbou drasties verhoog. Die eerste stap in die proses was die uitbreiding van die Suid-Afrikaanse span vir die verbetering van dienslewering. Dit, tesame met die bekendstelling van talle nuwe innoverende oplossings en die uitbreiding van die plaaslike verspreidingsnetwerk, het verhoogde waarde en toeganklikheid vir boere tot gevolg gehad.

“BASF het nuwe verhoudings met verskeie landbou-organisasies en instandhoudings in die bedryf gevestig en streef daarna om nuwe geleenthede te soek om beleggings te verhoog,” verseker Bright Breytenbach, BASF Gewasbeskerming se besigheidsbestuurder vir Suid-Afrika.

In 2017 het die Wes- en Suid-Kaapstreke van Suid-Afrika die ergste droogte van die afgelope eeu ervaar, wat bygedra het tot 'n baie moeilike seisoen vir talle boere. Dit sal boere in staat stel om steeds die nuutste tegnologie op hul kleingraan te gebruik gedurende 'n uitdagende seisoen en gevolglik 'n hoër opbrengs op belegging verseker.

BASF is toegewy aan boerdery en het besluit om te belê in plaaslike boerdery deur sy innoverende produk op kleingraan, Ceriax[®], meer bekostigbaar te maak vir boere.

“Ons is trots op die feit dat ons regtig na die bedryf luister,” sê Breytenbach. “Ons glo dat hierdie inisiatief plaaslike kleingraanboere aansienlik sal ondersteun en ons sal voortdurend na nuwe geleenthede soek om ons belegging in Suid-Afrika verder te verhoog.”

Ceriax[®], BASF se innoverende swamdoder op kleingraan

BASF was die eerste maatskappy in 2016 om 'n nuwe innoverende SDHI-groep-swamdoder op kleingraan in Suid-Afrika bekend te stel met die produk Ceriax[®], wat op koring en gars geregistreer is. Ceriax[®] bevat 'n nuwe aktiewe bestanddeel, Xemium[®], wat deel uitmaak van die karboxiamiedklas (SDHI). Xemium[®] het 'n merkwaardige chemiese struktuur met uitsonderlike eienskappe. Die aktiewe bestanddeel bied effektiewe voorkomende werking. Die unieke mobiliteit bied nie net baie

vinnige en staatmakerbeheer van bestaande infeksies nie, maar ook langdurige en betroubare beskerming van nuwe groei in die kleingraanplant.

Die nuwe “Stick and Stay”-formulasie van Ceriax[®] maak voorsiening vir uitstekende oppervlak-aktiwiteit, wat goed bedekte blare tot gevolg het. Die uitstekende verspreiding en benutting, goeie binding van spuitdruppels op die plantoppervlak, hoë beskikbaarheid van produkkonsentrasie op die plant, en tot 'n agt keer vinniger droogperiode as die meeste konvensionele swamdoders, maak die formulasie uitnemend geskik vir uitstekende reënvasheid tydens ongunstige weertoestande.

“Stick and Stay”-formulasies is bekend vir hul uitstekende biobeskikbaarheid, wat verhoogde aktiewe doeltreffendheid van die bestanddele tot gevolg het.

Die nuwe swamdoder Ceriax[®] verseker gemoedsrus ten opsigte van siektebeheer. Ceriax[®] verseker dat die gewas sy volle potensiaal bereik, selfs onder hoë siektedruktoestande. Die sistemiese en translaminêre beweging van Ceriax[®] in die plant verseker beheer van blaarvlek (*Rhynchosporium secalis*), bruinroes (*Puccinia hordei*), netvlek (*Pyrenophora teres*), poeieragtige skimmel (meeldou) (*Erisiphe graminis*) op gars, en vaalblaar en bruinaarsiekte (*Septoria* spp.), bruinroes (*Puccinia triticina*), stamroes (*Puccinia graminis*), poeieragtige skimmel (meeldou) (*Erisiphe graminis*) en geel-/streeproes (*Puccinia striiformis*) op koring.

Die voordele van Ceriax[®] sluit in:

- Unieke mobiliteit: Vinnige vervoer en eweredige verspreiding op en in die blare verseker langdurige beskerming teen siektes.
- Uitstekende siektebeheer: Drie verskillende wyses van werking in een bottel.
- 'n Innoverende “Stick and Stay”-formulasie: Vinnige opname en maksimum doeltreffendheid te midde van onvoorspelbare weerstoestande.

Meer oor BASF

BASF, wat in 1865 gestig is, is tans die grootste chemiese maatskappy ter wêreld. Die groep het in 2017 verkope van €64,5 miljard gegeneer. In 1914 is die BASF Landbou-sentrum deur Carl Bosch gestig met die hoofdoel om navorsing oor die toediening van kunsmis te doen. Sedertdien het BASF baie baanbrekende oplossings vir verskeie markte regoor die wêreld bekend gestel en vandag is BASF bekend in die landboubedryf vir die bekendstelling van innoverende gewasbeskermingsoplossings. ☐

We understand digital indicators,

FEELER

RSM 2375

AFFORDABLE & RELIABLE

ROSTSELMASH
Professional Agrotechnics

VERSATILE

SERIES OF ARTICULATED JOINTS TRACTORS ROSTSELMASH 2375

The RSM 2375 articulated tractors are high-performance, service-friendly and efficient machines, and with advanced implements attached, they can be used for a wide range of agricultural applications using any technology, including minimal-till and no-till.

HIGH-HORSEPOWER ENGINES BY CUMMINS®

The RSM 2375 tractors are equipped with QSM-11 11L in-line turbocharged engine with intercooler and electronic fuel injection, which are suited to operate at a 50% torque backup. These engine will start no matter the weather, they offer unrivalled service life when used for heavy-duty applications.

DRIVE AXLES

The RSM 2375 tractors are equipped with beefed-up final drives that ultimately transmit all the power to the drawbar, boosting tractor traction performance. Planetary hubs are suspended on large bearings attached directly to the axle beam, which supports most of the load.

This design reduces service time noticeably and extends axle service life.

90% + DRAGTIG! KOEIE IN 'N PUIK KONDISIE

Anette Wege
Kroonstad, Vrystaat

Afgesien van die afgelope klompie droë jare, het die toediening van die winterlek, Dryveld 46, beslis bygedra tot ons sukses.
Dankie Molatek!

DRYVELD 46

Dryveld 46 is 'n melasse-gebaseerde proteïen aanvulling op droëveld wat ruvoerinname stimuleer en sodoende wintermassaverliese beperk. Die lek aanvulling lei tot verhoogde konsepsie en kalfpersentasies en is geskik as onderhoudslek vir droë sowel as lakterende diere. Gemeng met graan, kan **Dryveld 46** ook as produksielek aangewend word. Boonop help die lek om droë galsiek te voorkom. Kyk dus uit vir die **GROOT 46** vir verbeterde prestasie en 'n winterlek wat werk!

SERVICE EXCELLENCE

At BKB we value the importance of trust. Trusting that the rains will return and that the land will produce for those who nurture it. Knowing that trust cannot be bought, but rather earned over time through our actions and our commitment to you, through the good times and bad. We take pride in the relationships we have built with generations of clients, each underpinned by integrity and bound through a look in the eye and the shake of a hand.

**VICRO
BULK**

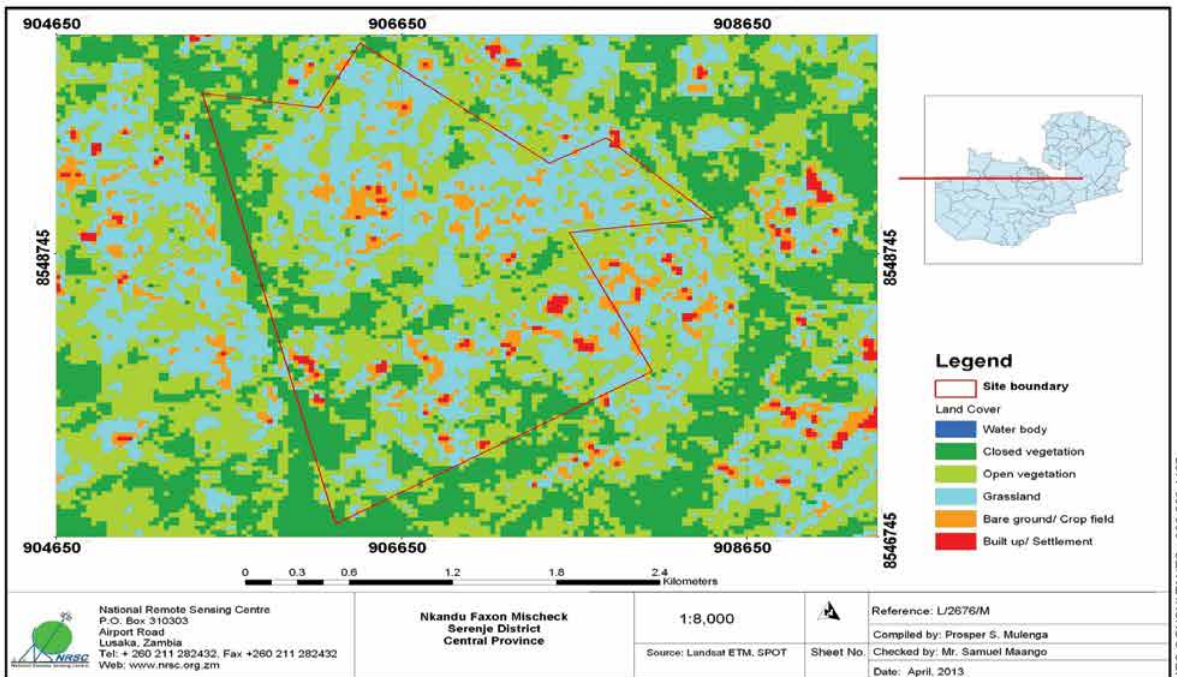

UNCULTIVATE FARMLAND FOR SALE OR LEASE

ARE YOU INTERESTED IN BUYING OR RENTING FARMLAND IN SERENJE, CENTRAL PROVINCE OF ZAMBIA?

- 598.8589 hectares (1.479.7803 acres)
- The land is 482km drive from the Zambia capital Lusaka, and is situated on the Great North Road
- Uncultivated agricultural land currently over grown with grass, trees and bushes
- Availability immediately
- Long lease lease or a part of for sale
 - ✓ **Lease price** - US\$2,500 a month for first twelve months with 5.5 per cent annual interest. *Open for negotiation*
 - ✓ **Sale price** - Up to 400 hectares or less available at \$1.200 per hectare *Open for negotiation*
- Kaombe farm is under a ninety-nine (99) year title deed.
- Site not yet serviced with mains electricity, water and sewerage services.
- Site with open sides to the perimeter boundaries.
- Tarred road frontage branching off Great North Road about 15 km. Key market considerations.
- Section of land with high concentration of trees and suitable for agro-forestry.
- Site with high potential for agricultural activities due its location, size and easy access.
- Two streams (the Kaombe and Ipila) run across the property.
- There's an unused airstrip not far from the land, which could be revamped and utilised.
- The land is in the Serenje/Mkushi area, which is one of the country's prime agricultural regions, with excellent rainfall and access to market roads and depot facilities.
- Water supply is not yet connected to the property and supply for domestic use is currently procured from the streams. Sewerage disposal would be through septic tanks and soak-away, although water supply can be through borehole once property is developed.
- Generally stable demand for agricultural properties in Zambia over the last five years.
- Ideal location within Kanona area with a frontage onto the tarred Mupepetwe Road, ensuring easy access to the farm.
- Part of the land (about 22 hectares) is severed from the farm by Zambia Electricity Supply Corporation (ZESCO) pylons.
- Two sets of ZESCO high voltage grip power lines run along the property road frontage.
- Electricity supply is not yet connected to the property. Supply can be connected from the ZESCO mains power lines which are about five km on the southern side of the land and near the communication towers. There is also a ZESCO substation on the Mupepetwe Road, about 8km of the farm.
- Small pockets of households (family members) are settled on the land. Some are squatters who can be easily moved and confined to one small section of the land and possibly incorporated into the workforce as labourers or resettled elsewhere by the Chief.
- Section of land with high concentration of trees and suitable for agro-forestry.
- There's an unused airstrip not far from the land, which could be revamped and utilised
- About 25km from the southern DRC border line and possible export market.
- The Tanzania Zambia Railway line (TAZARA) is 11 km from the farm. In addition, Kanona Railway Station is 17km following the tarred road route.

IF PROPERTY IS LEASED, AN ANNUAL INTEREST RATE OF 7.5% WILL BE CHARGED

CITY OF
TSHWANE
IGNITING EXCELLENCE

THE TSHWANE MARKET IS A UNIQUE CENTRE WHERE PRICES ARE FIXED AND FRESH PRODUCE IS TRADED TO THE MUTUAL BENEFIT OF SUPPLIERS, BUYERS AND CONSUMERS. IT PROVIDES EFFICIENT AND COST-EFFECTIVE INFRASTRUCTURE AND SERVICES THAT COMPLY WITH INTERNATIONAL STANDARDS.

The Tshwane Market has a national and international client-base. On the procurement side produce is obtained from producers country-wide and on the supply side the market is supported by buyers from all walks of life in South Africa, neighbouring countries and internationally.

Prices are formed on the basis of supply and demand and set the trend for prices nationally. Markets are often referred to as the stock exchange of the fresh produce industry. In terms of turnover, the Tshwane Market is the second largest market in South Africa and holds a 21,97% market share of the total turnover of the seventeen fresh produce markets in the country for the 2016/2017 financial year to date.

It has experienced resounding growth over the past financial years. The market played important socio-economic roles such as improved access to quality food, providing better marketing opportunities for farmers as well as providing employment and business

opportunities to communities.

The Market has direct and indirect impact on the City's economy. The direct impacts includes incomes, rentals, food security, trade and employment; whereas indirect impacts include taxes and tariffs, business development in the service industry as well as investment in capital expenditure.

All markets within the country currently use market agents to source produce from the producer and sell such produce on the producer's behalf. The produce remains the property of the farmer until it is sold and the market agent acts as his representative.

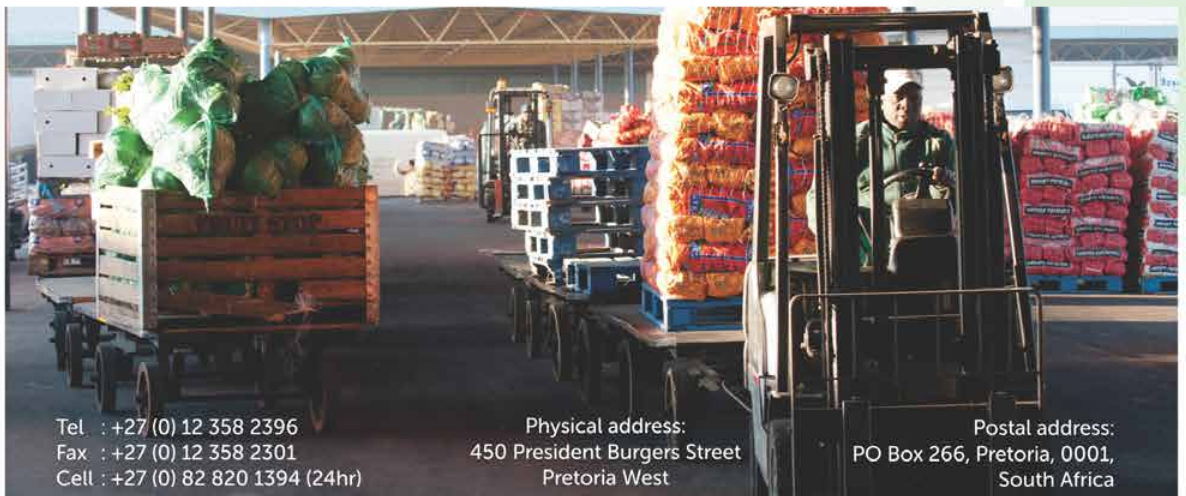

Although ownership is never transferred once the agent receives the producer's produce, he/she becomes responsible and accountable to the market authority/market management company for any shortages that may arise thereafter. The agent receives a commission for his/her services that are rendered.

TSHWANE FRESH PRODUCE MARKET

THE MARKET VERY FORTUNATE TO HAVE GOOD MARKET AGENTS. THERE ARE TEN COMMISSION AGENTS OPERATING ON THIS MARKET AND ALL OF THEM HAVE A GOOD REPUTATION IN THE FRESH PRODUCE INDUSTRY:

AGRICULTURE

Application & Dosage

SEED TREATMENT

80% of sown seeds, are untreated. Treatment with Peroxsil Ag+ for 8 - 12 hours before planting, protects the seeds from soil borne diseases, protects emerging seedlings from sucking insect pests that affect crop emergence and development. It increases seed germination, reduces mortality and enhances root formation.

USE A 1% SOLUTION.

ADD 10ML OF PEROXSIL AG+ TO 990ML OF WATER

SOIL STERILIZATION TREATMENT

Soil Sterilization is a pre-plantation treatment over soil-borne pathogens, and stubborn nematodes. To be applied uniformly over moistened soil beds using a spout method. Requires no water rinsing or plastic covering. After 12 hours, the soil is ready for planting.

DOSE 3 LITERS WATER WITH

35ML PEROXSIL AG+ PER M² OF SOIL APPLICATOR

SEED AND TREATMENT

The adoption of plant protection measures, catalyzes efficient development of nursery plants. Soil containing pathogens affect the growth and development of seedlings.

SEED BEDS SHOULD BE DRENCHED WITH 10ML PEROXSIL AG+ PER LITER OF WATER, 7 - 15 DAYS AFTER GERMINATION.

DRIP METHOD TREATMENT

Peroxsil Ag+ dosed at 1 - 2 ml/liter of irrigation water is fed to the plant root through a drip line. This must be repeated once every 15 days. This prevents re-growth of infectious pathogens. Prolonged use of drip lines leads to the formation of biofilm. With Peroxsil Ag+ the clogging of drip lines and closing meters can be averted.

PEROXASIL AG+ DOSED AT 1 - 2 ML/LITER OF IRRIGATION WATER

PEROXISIL™ Ag+

DRENCH METHOD

It is best to drench the soil early in the growing season giving it time to dispense within the plant before pathogens flourish. Frequency of drenching is reliant on the weather and age of the crop.

THE SOIL CAN BE DRENCHED EVERY 15 – 30 DAYS WITH A SOLUTION OF 2 – 5ML PEROXSIL AG+ PER LITER OF WATER.

FOLIAR SPRAYING

Foliar spray should be applied in the early morning. Peroxisil Ag+ solution at 1–3ml per liter of water sprayed once every 7–15 days to control white powdery growth on leaves. This serves as a preventative measure. Spraying schedules should be fixed.

PEROXISIL AG+ SOLUTION AT 1–3ML PER LITER OF WATER

HYDROPONICS TREATMENT

Growing hydroponically in a range of substrates can be a good alternative to regular soil but they harbor pathogens such as Pythium sp. etc... requiring their timely disinfection. This method will prevent cross contamination.

SOAK THE COCOPEAT UNTIL SOGGY & WET FOR 4 – 6 HOURS WITH A DILUTION OF 5ML OF PEROXSIL AG+ PER LITRE OF WATER.

POST WASH HARVESTING

Pesticide application leaves unwanted taste, and toxic residues on the produce prompting consumer rejection. Washing with Peroxisil Ag+ at 1ml/liter of water ensures farm-fresh appearance, eliminates toxic surface residues, increases shelf life of the produce, even after prolonged storage.

WASHING WITH PEROXSIL AG+ AT 1ML/LITER

POWERFUL PRECISION MADE EASY...

The Topcon portfolio of precision farming products features the most advanced technology for guidance, auto steering, variable rate control, auto section control, crop canopy sensing, water management and farm data management. All designed to be user friendly and easy to use.

Topcon's lineup of precision farming consoles will help you improve operational efficiency and reduce input costs:

X30 Console

The industry's easiest to use touchscreen display with icon-based, user-definable interface.

X25 Console

Full-featured precision for price-conscious farmers – A mid-range 8.4" color touchscreen console for smaller cab environments.

X14 Console

Topcon's precision farming controller for entry level visual guidance or auto steering, offers the same look and feel of the easy-to-use X30 touchscreen.

Burquip

international

Burquip International has been a leading manufacturer, importer and distributor of high speed trailer and agricultural implement trailer components in the Southern African market for over 25 years.

We offer a wide range of high speed and agricultural trailer components that will serve the unique requirements of each of these markets from one of the three branch outlets within South Africa. Exports to African countries include amongst others Namibia, Botswana, Zimbabwe, Mozambique, Zambia and Malawi. Burquip's axle manufactured standard length trailer axles are readily available from outlets and any custom order or large quantity order can be supplied within 10 days from receipt of order. Burquip's sales representatives are trained to assist you with your enquiries and will also prepare quotations on your request.

CUSTOM BUILT TRAILERS

“if you can think it, we can build it”

We offer a wide range of custom trailers, heavy duty and bike trailers for sale, and undertake custom trailers suitable for almost any application.

At Diamond Trailers we have a solid reputation for exceptional construction and quality, and all our trailers for sale are built using top-grade components and materials, ensuring our commercial, multi and bike trailers easily meet the necessary approvals.

HPE Africa gaan tydens Nampo 2018, die veelsydige grondverskuivingstoerusting van Hyundai Construction Equipment tentoonstel by stalletjie A4.

Hyundai se mini-graafmasjiene en mini-laaigrawe is hoogs doeltreffend en kan met menige moeilike take in die boerderyomgewing klaarspeel, insluitend die grawe van vore, ontbossing en algemene onderhoudswerk.

Die Hyundai R60-9s mini-graafmasjiene, wat in beperkte ruimtes kan werk en die veelsydige vermoë het om baie ander landboukundige take te hanteer soos gras- en onkruidbeheer, ontbossing, die oprigting van draadheininge en die grawe van vore, sal vertoon word.

Die Hyundai HSL850-7 mini-laaigraaf, wat in verskeie toepassings gebruik kan word soos die skoonmaak van hoenderhokke en voerbakke, om hooibale, palette en planke te verskuif, en die installasie van tenks en die grawe van slote, sal ook vertoon word.

Spesiaal ontwerpte booraanhegsels vergemaklik take soos die aanplant van bome, die maak van gate vir heiningpale en die verpulping van boomstompe.

Get connected to the farmer... just a click away!

If you're not advertising on the AGRIFOODSA.INFO website yet, you need to get right on it!

With improved functionality and enhanced design, it promises to be a fundamental tool for farmers and enthusiasts of the agricultural and secondary industries in South Africa.

The new website affords the user the opportunity to read and download the AGRIFOODSA Suppliers Guide Magazine, offering additional exposure to our print advertisers.

There are advertising options to meet everyone's needs. Possibilities range from premium directory listings to banner adverts on the HOME page. All major players in Agri and food are able to get incredible coverage and marketing benefits at very reasonable prices.

Advertisers who appear in our Suppliers Guide have the opportunity to book premium listings on our website at a fraction of the standard price.

As part of the AGRIFOODSA.INFO website, advertisers will enjoy the following brand promotion:

- Google Search Engine Optimization of the AGRIFOODSA.INFO website;
- Advertising of the AGRIFOODSA.INFO website in various other Agricultural publications;
- Coverage on our Social Media pages; and
- Exposure through our monthly newsletter which will be e-mailed to 18,000 links across Southern Africa.

We are also presenting website advertisers with the opportunity to have broadcasts, special offers or short articles on new products and/or services posted to our brand-new NEWS Page.

We are driven by **performance**,
passionate about **our clients**
and focussed on achieving **results**.

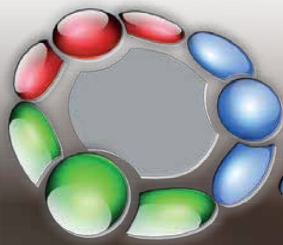

Look out for the fresh, innovative AGRIFOODSA.INFO website LIVE!

For more information or to advertise, contact us today.
